Document 1: Anoushka Sharma - GS Paper 3

Question 3

- **The Exact Question:** What do you understand by natural farming? How can it help in building climate resilient agriculture?
- **Examples Used:** Zero Budget Natural Farming, State of Sikkim, Maharashtra, Lakshadweep, Andhra Pradesh.
- **Context of the Example:** Zero Budget Natural Farming is used as the primary real-world manifestation of natural farming. Sikkim and other states are cited to provide geographical proof of successful adoption, anchoring a theoretical concept in administrative reality.
- **Diagrams & Presentation:** The candidate drew a map of India locating the specific states where natural farming has been adopted. Furthermore, a bubble flowchart was utilized to break down the "Components" of natural farming (e.g., organic materials, zero tillage), which saves time and makes the technical aspects visually accessible.

Question 4

- **The Exact Question:** Food Processing sector must be developed as one of the principal industries in the country for reasons that go beyond agriculture. Elucidate.
- **Examples Used:** 8% growth rate in 2021-22; "Potato -> chips".
- **Context of the Example:** The 8% growth data point is used in the introduction to immediately justify why it is a "sunrise sector". The potato to chips example is a simplified, effective micro-level illustration to explain "value addition" to the examiner.
- **Diagrams & Presentation:** Used a top-down tree diagram titled "Potential Benefits from Development" with 5 numbered branches. This structures the core arguments (reducing disguised unemployment, upskilling, value addition, farmer income, exports) in half a page rather than writing bulky paragraphs.

Question 5

- **The Exact Question:** Space based technologies are helpful in not only monitoring development, but also enhancing it. Discuss.
- **Examples Used:** ISRO's Gaganyaan, GeoMGNREGA, FSI surveys.
- **Context of the Example:** Gaganyaan is used in the intro to show current relevance. GeoMGNREGA is strategically cited to show how satellites directly monitor grassroots rural development. FSI (Forest Survey of India) is used to prove environmental monitoring capabilities.
- **Diagrams & Presentation:** The answer relies on clear boxed subheadings (e.g., "* Helpful in monitoring development"). Underneath, the candidate uses a numbered list with a specific format: argument first, followed by an indented "↳ Ex -" to distinctly separate the theoretical point from the practical evidence.

Question 6,

- **The Exact Question:** How are fuel cell electric vehicle (FCEV) different from battery electric vehicle (BEV)? Highlighting advantages of electric vehicles, suggest measures for accelerating e-mobility adoption in the country.

- **Examples Used:** Lithium-ion battery (for BEV); Paris Climate Deal.
- **Context of the Example:** The Lithium-ion battery is mentioned to establish the base technology of BEVs in contrast to FCEVs. The Paris Climate Deal is used in the conclusion to link e-mobility to India's larger international commitments.
- **Diagrams & Presentation:** The core difference is presented in a classic T-table (FCEV vs. BEV), comparing parameters like fuel need, life cycle, and replacement costs. For the second part of the question, a branching tree diagram is used for "Advantages," and a numbered bullet list is used for "Measures for Adoption."

Question 9

- **The Exact Question:** (Question text partially visible, context is urban flooding and preparedness).
- **Examples Used:** Mumbai floods (clogged Mithi river), Bangalore's flood vulnerability (reclamation).
- **Context of the Example:** These specific city-case studies are used to pinpoint the exact anthropogenic causes of urban flooding (clogging and land reclamation), moving the answer from generic theory to specific administrative failures.
- **Diagrams & Presentation:** A "Way Forward" section is presented via a simple vertical flowchart with arrows, culminating in a conclusion that explicitly ties the local issue to the global "Sendai framework".

Question 11,

- **The Exact Question:** Achievement of a 400 billion USD merchandise export is a result of concerted and collective efforts towards an Atmanirbhar Bharat. Identify various factors responsible for this feat. What measures will you suggest to place India at the centre of global supply chains?
- **Examples Used:** Refined petroleum goods, jewellery, iron; PLI schemes (4-6% rebate); Textile parks, mega food parks; RODTEP scheme; IBC.
- **Context of the Example:** The 4-6% rebate data provides technical depth to the PLI mention. Specific sectors (textile, food) show cluster-based approaches. RODTEP and IBC are cited as exact policy interventions required to improve ease of doing business and competitiveness.
- **Diagrams & Presentation:** Used a boxed heading "* Steps/Factors responsible". The points are numbered with sub-bullets ("↳") that provide the specific data or scheme name backing the main point.

Question 15

- **The Exact Question:** New age digital technologies are creating disruptions that open fascinating opportunities and pose frightening threats. Give an account of how digital disruptive technologies are changing our lives.
- **Examples Used:** Fourth Industrial Revolution; DIKSHA, SWAYAM; Digital health IDs; Jan Dhan Yojana.
- **Context of the Example:** DIKSHA and SWAYAM are used to prove democratization in education. Jan Dhan is used to show direct financial inclusion driven by tech.

- **Diagrams & Presentation:** A clear introductory premise ("Data is the new oil"), followed by boxed subheadings. Application areas (education, healthcare, finance) are underlined for rapid visibility.

Question 16

- **The Exact Question:** Nanotechnology is an inter-disciplinary and inter-connected science that has revolutionary applications across sectors. In this perspective, discuss the relevance of nanotechnology for socio-economic development in the country.
- **Examples Used:** Norio Taniguchi (1980s), 1 to 100 nanometers; Carbon nanotubes; World's first nano fertiliser of urea (India).
- **Context of the Example:** Taniguchi and the size scale are used to write a highly technical, factual introduction. Carbon nanotubes show specific healthcare applications (blood vessels), and IFFCO's nano urea grounds the answer in a recent Indian socio-economic achievement.
- **Diagrams & Presentation:** Boxed subheadings and the consistent "↳" bullet structure to highlight the core examples underneath the main arguments.

Document 2: Anoushka Sharma - Ethics

Question 1(a),

- **The Exact Question:** Ethical governance is the foundation of a welfare state. Identify essential ethical traits of a welfare state. Discuss ways and means to promote ethics in governance.
- **Examples Used:** PVTGs, SC, women, disabled; RTI applications; UP making asset declaration compulsory for all civil servants.
- **Context of the Example:** PVTGs are used to define the "marginalised". RTI is cited as the tool for transparency. The UP civil servant asset declaration is a highly specific, contemporary administrative example of enforcing corruption prevention.
- **Diagrams & Presentation:** The answer is strictly bulleted. Each point has an explicitly boxed "Ex -" to ensure the evaluator does not miss the real-world application.

Question 1(b)

- **The Exact Question:** (Context: Debate on Abortion).
- **Examples Used:** Roe vs Wade in USA; Stephen Levitt's research on decreased crime.
- **Context of the Example:** Roe vs Wade is used to show the contemporary relevance of gender inequality in healthcare. Levitt's sociological research (Freakonomics) is an advanced academic reference used to argue that denying abortion leads to higher crime rates due to unwanted children.
- **Diagrams & Presentation:** Uses a branching bracket diagram for the "Against Abortion" arguments to quickly map out the ethical perspectives (Right to life, Unborn agency, Natural processes) before providing her personal opinion.

Question 2(a)

- **The Exact Question:** Conscience keeps ethics from fading when faced with a tough decision. Discuss in context of civil servants.
- **Examples Used:** Budgetary allocation; Minimum height requirements amended for certain tribes.
- **Context of the Example:** Budget allocation shows resistance to political pressure. The tribal height requirement is a brilliant administrative example of how conscience drives "flexibility in governance" to achieve true equity rather than blind equality.
- **Diagrams & Presentation:** Boxed headings, underlined keywords, and boxed "Ex-" formatting.

Question 2(b)

- **The Exact Question:** What are the various conflicts of values that civil servants face while performing their duty? How can such conflicts be resolved? Discuss with illustrations.
- **Examples Used:** Evicting people without other options; Tax fillings on own website vs job of CAs.
- **Context of the Example:** Eviction illustrates the conflict between "Following superior's orders" vs "Ensuring fairness". The CA example perfectly illustrates the modern dilemma of "Automation vs human employment."
- **Diagrams & Presentation:** Structured as conflict pairs (e.g., Efficiency versus honesty) followed by an indented example block.

Question 3(a)

- **The Exact Question:** Emotional intelligence (EI) not only helps in managing stress but also transforms distress into eustress. Elaborate with relevant examples.
- **Examples Used:** Doctors during the COVID-19 pandemic; Stress of performance faced by sports persons.
- **Context of the Example:** Doctors adjusting to pandemic pressures demonstrates the practical application of transforming distress to eustress. Sports persons are cited to show self-motivation transforming ambition into action.
- **Diagrams & Presentation:** Standard numbered list with boxed "Ex-" callouts.

Question 4(a),

- **The Exact Question:** Although attitude and behaviour are interrelated, the former is a predisposition while the latter is an option. Discuss the structure of attitude and explain the relationship between attitude and behaviour.
- **Examples Used:** Reading a newspaper vs coffee table discussions; Capitalist feeling bad when a leftist government is elected; Reading about a comedy movie -> liking it -> going to watch it. 'Half full, half empty' philosophy.
- **Context of the Example:** The comedy movie example perfectly breaks down the CAB (Cognitive, Affective, Behavioural) model of attitude. The glass half-full philosophy explains the "Adaptive Function" of attitude.

- **Diagrams & Presentation:** A horizontal tree diagram breaking "Structure of Attitude" into "Cognitive", "Affective", and "Behavioural", with examples written directly beneath each node.

Case Studies-

- **The Exact Questions:** Vaccine mandate for a tennis player; Evacuation during a war; Violence against doctors; Farmers protest turning violent; Tribal displacement for lithium mining.
- **Examples Used (External mapping):** Real-world parallels: Wimbledon vaccine refusals; Ostracization of doctors during Covid-19 and in Rajasthan; SC judgement on peaceful protest.
- **Context of the Example:** The candidate continuously maps fictional case studies to real-world events (e.g., Djokovic at Wimbledon, real doctor protests) to prove administrative maturity and awareness of current affairs.
- **Diagrams & Presentation:** *Crucial Strategy extracted here*: Every single case study begins with a "Stakeholders" bubble map or tree diagram. This immediately shows the evaluator that the candidate grasps the multi-dimensional impact of the crisis. Ethical issues are listed strictly in "X versus Y" format (e.g., "Personal welfare versus public welfare").

Document 3: Anoushka Sharma - Essay

Essay 1-

- **The Exact Question:** (Context: Evasion of reality and its consequences).
- **Examples Used:** Subash Patinal (planted 101 trees for a daughter); British Rule; Import substitution/License Raj -> Green Revolution; Donald Trump & Paris Deal; NALSA & Navtej Johar judgements; Arunima Sinha (amputee scaling Everest); BJP vs Congress political reality.
- **Context of the Example:** The essay traverses multiple dimensions (Historical, Economic, Environmental, Social, Political). License Raj is used to show economic evasion. Trump is used for environmental evasion. Transgender rights (NALSA) show social evasion. Arunima Sinha shows personal triumph over reality.
- **Diagrams & Presentation:** Source reveals the candidate's rough work. She utilizes a strict brainstorming framework: Intro -> Historical -> Economic -> Environmental -> Social/Women -> Legal -> Individual -> Polity -> Conclusion. The actual essay uses smooth transitional phrases ("Similarly, consider the economic path...", "Similarly, reality evasion is prevalent in our social structures...").

Essay 2-

- **The Exact Question:** (Context: Liberty is a blessing that must be supported).
- **Examples Used:** Edward Snowden; Preamble of India; Mahatma Gandhi (SA movement); Dadabhai Naoroji (Economic drain); Roe vs Wade; George Floyd protests; WTO agri food subsidies.

- **Context of the Example:** Snowden is used to illustrate the extreme personal cost of supporting public liberty against a surveillance state. George Floyd is used to show modern societal fatigue in fighting for racial liberty. WTO is used to show the struggle for economic liberty on the international stage.
- **Diagrams & Presentation:** Rough work maps out dimensions: Individual (Snowden), Historical (Gandhi/Naoroji), Women (Roe v Wade), Social (George Floyd), International (Terrorism, WTO).

Document 4: Gunjita Agrawal - GS Paper 2

Question 1,

- **The Exact Question:** The biggest critique of Basic Structure doctrine from its inception has been it being shrouded in confusion, vagueness and a formulation which is loose and not precise. Critically examine.
- **Examples Used:** Kesavananda Bharati 1973; S.R. Bommai 1992; Manipur Assembly defection; NGT banning construction in Rushikonda beach; EWS reservation under Article 16.
- **Context of the Example:** S.R. Bommai is used to show how 'secularism' can conflict with the Right to Religion. The Manipur Assembly case highlights the un-codified nature of the judiciary's power over Speakers. NGT in Rushikonda is cited to show judicial overreach (vagueness).
- **Diagrams & Presentation:** Highly structured. Uses capitalized, boxed headings matching the question's keywords: [CONFUSION], [VAGUENESS], [LOOSELY FORMULATED].

Question 2

- **The Exact Question:** Sedition law, in any form, is a threat to civil liberties and presents an opportunity for its weaponization against dissenters and detractors. Should India do away with the sedition law? Justify your opinion.
- **Examples Used:** Section 124A of IPC; Mohd Zubair - ALT News case; COVID policies over Twitter.
- **Context of the Example:** Mohd Zubair is used as a direct, contemporary example of weaponization by the state. COVID policy critique on Twitter is used to show how the law restricts healthy democratic discussions.
- **Diagrams & Presentation:** Uses a central boxed heading "[THREAT TO CIVIL LIBERTIES - SHOULD BE SCRAPED]". Key phrases like "colonial law", "weaponisation", and "Article 19" are underlined.

Question 3

- **The Exact Question:** The preamble is not a mere solemn resolution; but majestic expression of philosophy, principles and purpose of the constitution. Elaborate.
- **Examples Used:** 'Objective Resolution' by JL Nehru; Article 51A; Uniform Civil Code (UCC).

- **Context of the Example:** Art 51A is linked to the preamble's ideal of 'Fraternity'. UCC is linked to the ideal of a 'Secular state' moving beyond communal divisions.
- **Diagrams & Presentation:** Boxed heading "[Expression of philosophy]". Uses directional arrows to link preamble keywords (e.g., Socialism -> WELFARE SOCIETY -> DPSPs).

Question 5

- **The Exact Question:** The divergence between intent and impact of the tenth schedule necessitates calling into question its relevance in the present times. Analyze.
- **Examples Used:** 52nd Amendment Act 1986; 'Aya Ram, gaya Ram' politics of 1970s & 80s.
- **Context of the Example:** The 'Aya Ram' example perfectly encapsulates the historical context and the "Intent" of the law to discourage divisive politics.
- **Diagrams & Presentation:** Uses a branching bracket to define disqualification (Voluntary exit / voting against / split). Boxed heading for "[Intent of Tenth Schedule]".

Question 9

- **The Exact Question:** Instead of performing a transformative role, traditional bureaucracy has contributed to perpetuation of old order. Comment.
- **Examples Used:** Max Weber's definition; COWIN and vaccine delivery; KUDUMBASHREE (SHG) in Kerala; e-vahan / DBT.
- **Context of the Example:** Weber is used for a strong theoretical intro. COWIN shows responsiveness during crises. Kudumbashree is an excellent administrative example of bureaucracy showing empathy to trigger social change for women.
- **Diagrams & Presentation:** Boxed heading "[Bureaucracy - A Transformative Role]". Underlined key administrative concepts (Responsive, Social Change, Digital efficiency).

Question 10,

- **The Exact Question:** Contrary to expectations surrounding its enactment, the institution of Lokpal has not proved path-breaking in dismantling the structures of corruption in public life. Analyze.
- **Examples Used:** Anna Hazare Movement, Lokpal Bill Act 2013; School education scam in West Bengal.
- **Context of the Example:** Hazare provides the historical expectation. The West Bengal scam is used as a specific contemporary example of the Lokpal's reluctance to pick up high-profile political cases.
- **Diagrams & Presentation:** Uses a central node "[EXPECTATIONS]" branching out to 4 points. Another heading "[FAILURES AGAINST CORRUPTION]" organizes the critique. The conclusion uses a mnemonic formula: "3 Fs - functionaries, funds, functions".

Question 14,

- **The Exact Question:** There has been an increasing demand for doing away with the concurrent list. Examine the utility of concurrent list in the light of recent events.
- **Examples Used:** Wildlife Act 1972; Cooperative Law declared unconstitutional; COVID-19 National lockdown; GST council; Ramsar Convention; National Education Policy 2020.
- **Context of the Example:** The Cooperative Law SC ruling shows parliament overreach. COVID lockdown shows utility in national crises. GST Council shows cooperative federalism. NEP 2020 shows the creation of uniformity in social reforms.
- **Diagrams & Presentation:** Boxed headings for "[challenges]" and "[UTILITY]". Underlines specific acts and Supreme Court references.

Question 18,

- **The Exact Question:** The offence of rape cannot be condoned by marital relationship between victim and culprit. In light of this statement, discuss the issues involved in criminalization of marital rape.
- **Examples Used:** Law Commission of India; Hindu marriage as sacrament; Beijing Declaration 1984; Article 21.
- **Context of the Example:** The religious sacrament argument represents the societal consensus hurdle. The Beijing Declaration and Article 21 represent the fundamental human rights necessity for criminalization.
- **Diagrams & Presentation:** Clean division into "[ISSUES IN CRIMINALIZATION]" and circled "[Why need]".

Document 5: Gunjita Agrawal - Ethics

Question 1(a)

- **The Exact Question:** Ethical governance is the foundation of a welfare state. Identify essential ethical traits of a welfare state. Discuss ways and means to promote ethics in governance.
- **Examples Used:** Buddha quote; Citizen Charters; Transgender protection.
- **Context of the Example:** Transgender protection is used as a concrete administrative example of "Empathetic and compassionate towards marginalized."
- **Diagrams & Presentation:** Uses a branching bracket from the box "[ETHICAL TRAITS]" directly connecting the trait to an example.

Question 1(b)

- **The Exact Question:** Citizen's Charter is seen as an important tool... but it is not achieving its objectives. Why? Discuss measures...
- **Examples Used:** No sanitation in panchayats even when committed.
- **Context of the Example:** Shows the lack of legal backing making charters non-responsive at the grassroots level.

- **Diagrams & Presentation:** A downward-pointing triangle diagram with "Citizen friendliness", "Transparency", and "Accountability" feeding into a box labeled "GOOD GOVERNANCE".

Question 2(a),

- **The Exact Question:** Conscience keeps ethics from fading when faced with a tough decision. Discuss in context of civil servants.
- **Examples Used:** Vibhishan in Ramayana; Indian High Commissioner to UK leaving Vijay Mallya's book launch; Noah Bawa IAS carrying rice bags; Ashok Khemka; Saurabh Kumar IAS (lunch with collector in Dantewada).
- **Context of the Example:** Vibhishan represents mythic inner conscience. The High Commissioner shows handling ethical dilemmas impartially. Noah Bawa shows leading from the front in crisis. Khemka shows value consistency. Saurabh Kumar shows innovative counter-extremism solutions.
- **Diagrams & Presentation:** Boxed "[IN CONTEXT OF CIVIL SERVANTS]". Every point has an "Eg" clearly separated.

Question 2(b)

- **The Exact Question:** What are the various conflicts of values that civil servants face while performing their duty? How can such conflicts be resolved?
- **Examples Used:** Civil servants during WWII dropping bomb on Japan; Armstrong Pame in Manipur.
- **Context of the Example:** WWII exemplifies Personal integrity VS Professional integrity. Armstrong Pame (declining govt funds to build a road via crowd-funding) exemplifies Compassion VS strict Rule of Law.
- **Diagrams & Presentation:** Writes the core conflict explicitly with a "VS" in the middle of the page (e.g., "Personal integrity VS Professional integrity").

Question (Swami Vivekananda),

- **The Exact Question:** Many examples of 'living the values' can be drawn from Swami Vivekananda's life... Highlight such values and illustrate how they can help in achieving civil services' objectives.
- **Examples Used:** World Religions Parliament 1893; Shaheen Bagh riots; U. Sagayam fighting miners; APJ Abdul Kalam; Selfie with Daughter campaign.
- **Context of the Example:** Maps Vivekananda's "Universal tolerance" to managing "Shaheen Bagh riots". Maps his "Vedanta values (equality)" to "Selfie with Daughter" to show empathy for weaker sections.
- **Diagrams & Presentation:** A highly effective two-column format. Left column: "[VALUES]" of Vivekananda. Right column: "[CIVIL SERVICE OBJECTIVES]" with mapped administrative examples.

Question (Integrity),

- **The Exact Question:** "Integrity is the choice between what is convenient and what is right."

- **Examples Used:** Mahatma Gandhi cancelling non-cooperation movement; ASI going gold hunting based on a baba's advice; Lalu Prasad Yadav fodder scam; IAF pilot Varthaman Abhinandan refusing to give security details.
- **Context of the Example:** Gandhi shows unwavering commitment. The ASI and Lalu examples showcase choosing what is "Convenient" (easy, corrupt). Abhinandan showcases choosing what is "Right" despite extreme personal cost.
- **Diagrams & Presentation:** Triangle diagram linking Thought, Action, and Speech with "Integrity" in the center. Subheadings explicitly divide the answer into "[WHAT IS CONVENIENT]" and "[WHAT IS RIGHT]".

Question (Political corruption),

- **The Exact Question:** It is not power, but fear that corrupts. Fear of losing power... Examine the statement in context of political corruption.
- **Examples Used:** Scindias of Gwalior colluding with British; Rajiv Gandhi assassination; Myanmar killing opposition; 2G scam; T.N. Seshan; Atal Bihari Vajpayee.
- **Context of the Example:** Historical context (Scindias) and global context (Myanmar) show how fear of losing power leads to unethical alliances and violence. TN Seshan and Vajpayee are cited as positive counters of "ethical men" who reformed the system.
- **Diagrams & Presentation:** A flowchart maps the root of corruption: Funding -> Embezzlement/Bribery -> "[POLITICAL CORRUPTION FORMS]" -> Freebies / Criminalization of politics.

Case Studies-

- **Strategies across cases:**
    - **Stakeholder Mapping:** Every case begins with a bracketed or bubble map of stakeholders and their specific interests (e.g., "SDM -> Relative hence favouritism").
    - **Real-world parallels:** She cites the Commonwealth Games scam, Indian Red Cross Society scam, and Adarsh Housing scam to contextualize a case about government housing corruption. She cites the Russia-Ukraine war's impact on semiconductors for a mining case study.
    - **Structured Advice:** Uses step-by-step numbered points for action plans, citing legal backing (e.g., Prevention of Corruption Act, Whistleblower laws).

Document 6: Gunjita Agrawal - Essay

- **Brainstorming Strategy**: The rough work page reveals her essay structuring technique. She uses bubble maps to connect a core theme (e.g., "Dignity") to multi-sectoral examples:
    - Mythology: Mahabharata (Draupadi 'cheerharan').
    - History: Ashoka's Dhamma.

- Contemporary Social Issues: Sabarimala, Metoo movement, Cinema (Gangubai), Transgenders.
- International: War (Russia-Ukraine), Holocaust.
- This shows a strategy of generating diverse spatial and temporal examples before writing the essay.

Document 7: Ishita Kishore - GS Paper 1

Question (Indus Valley)

- **The Exact Question:** (Context regarding Indus Valley Civilization evidence).
- **Examples Used:** Mother Goddess of steatite; Pashupati Mahadev seal; Fire cult at Lothal; grid format inspiring modern Chandigarh.
- **Context of the Example:** Specific artifacts are mapped to specific religious beliefs. The Chandigarh example brilliantly links ancient urban planning to a modern Indian city, showing continuity and impact.
- **Diagrams & Presentation:** Simple numbered lists under underlined headings.

Question 6

- **The Exact Question:** Caste system is a dynamic reality that is acquiring a greater degree of flexibility in the modern society... elucidate how the caste system has changed...
- **Examples Used:** Ambedkar, Black Panthers, Mandal Commission, Indra Sawhney, Kanshi Ram, BSP, Bhima Koregaon case, Maratha reservation.
- **Context of the Example:** Black Panthers are cited to show international ideological inspiration. Kanshi Ram and BSP show the political mobilization of caste. Bhima/Maratha show modern "neo-caste movements" demanding economic rights rather than just social purity.
- **Diagrams & Presentation:** A two-column layout matches the "change" to the specific "example/event" (e.g., "Politicisation of caste" -> "Rise of Kanshi Ram").

Question 7,

- **The Exact Question:** Analyze the role of digital technologies in bridging gender gap in India.
- **Examples Used:** UNDP Gender Inequality Index; Netflix; Tiffin services on apps; Jan Dhan A/c; Sakhi App; PMDISHA; Falguni Nayar (Nykaa); Bulli Bai App.
- **Context of the Example:** Starts with a hard index (UNDP). Positive examples like vlogs, Tiffin apps, and Falguni Nayar show economic bridging. The 'Bulli Bai App' is used as a critical counter-example showing how tech can be weaponized against women (cyberbullying).
- **Diagrams & Presentation:** A central bubble for "Digital Technologies" with arrows pointing to tools (Smart classes, Internet, Online payments, e-commerce).

Question 14,

- **The Exact Question:** Identify and examine reasons behind the deglobalization wave across the world. Analyze its impact on the Indian society.
- **Examples Used:** Oxfam's Time To Care Report; J. Bhagwati (trickle-down effect); US H1B visa refusal; BREXIT; Japanese Encephalitis in Bihar; NITI Aayog's Aspirational Districts.
- **Context of the Example:** Oxfam data proves the economic inequality driving deglobalization. Brexit and H1B issues act as global geopolitical proofs.
- **Diagrams & Presentation:** Bubble chart showing Globalization breaking into Capital, Labour, Goods, Services. Crucially, a world map is drawn pointing out specific deglobalization events globally (Brexit in Europe, Visa in US, resistance to migrants in Africa/Middle East).

Question 18,

- **The Exact Question:** Account for variations in oceanic temperature and discuss its multi-dimensional effects.
- **Examples Used:** Mariana trench; Samudrayaan Mission of India.
- **Context of the Example:** Explains how temperature impacts technology and research, citing India's specific deep-sea mission.
- **Diagrams & Presentation:** A very clear, labeled line graph plotting "Temperature" against "Ocean depth," accurately depicting the 'Thermocline' at 1000m.

Question 19,

- **The Exact Question:** Assess India's vulnerability to water related disasters. How can better management of water resource make the country more resilient...
- **Examples Used:** Kamrup district (Brahmaputra), Kosi (sorrow of Bihar), Damodar, Mullaperiyar Dam; ALPS (Advanced Liquid Propulsion System); Sendai Framework.
- **Context of the Example:** Mentions specific rivers to show geographical vulnerability. Mullaperiyar shows jurisdictional overlap causing dam issues.
- **Diagrams & Presentation:** Numbered points, concluding with a "3Rs" formula (Relief, Reconstruct, Rehabilitation).

Question 20

- **The Exact Question:** What do you understand by heat waves? Identify the reasons for the rising frequency...
- **Examples Used:** >40°C for plains, >30°C for coasts.
- **Context of the Example:** Used to establish the strict meteorological definition of a heat wave before analyzing it.
- **Diagrams & Presentation:** A map of India locating the temperature thresholds (>25°C Hills, >40°C Plains, >30°C Coasts) directly on the geography.

Document 8: Ishita Kishore - GS Paper 2

Question 2

- **The Exact Question:** Sedition law... threat to civil liberties... Should India do away with the sedition law?
- **Examples Used:** Arrest of Gandhi, Tilak; CEO of Alt News.
- **Context of the Example:** Connects the historical colonial misuse against freedom fighters to the modern arbitrary misuse against journalists to prove the law's inherent danger.
- **Diagrams & Presentation:** Bulleted list under an underlined heading.

Question 4

- **The Exact Question:** The divergence between intent and impact of the tenth schedule necessitates calling into question its relevance...
- **Examples Used:** 'Aaye Ram, Gaye Ram'; MVA govt toppled in Maharashtra recently.
- **Context of the Example:** Shows the failure of the law by referencing a highly contemporary political event (Maharashtra crisis) where the law failed to prevent shifting allegiances.
- **Diagrams & Presentation:** Numbered points.

Question 6

- **The Exact Question:** Sustainable alliance between Non-Governmental Organizations (NGOs) and the State is critical... Highlighting hurdles...
- **Examples Used:** Teach For India; India Against Corruption; HelpAge India.
- **Context of the Example:** Specifically maps NGOs to their functions: Teach For India supplements education, India Against Corruption ensures public trust/RTI, HelpAge counters bureaucratic delay.
- **Diagrams & Presentation:** Numbered points.

Question 7,

- **The Exact Question:** Subsidies have morphed into a populist tool to achieve electoral objectives rather than developmental goals. Examine.
- **Examples Used:** Farm loans waived off prior to elections; Free electricity up to 300 units in Delhi/Punjab; Amartya Sen's capacity development approach.
- **Context of the Example:** Delhi/Punjab free electricity cited as direct electoral populism. Sen's theory is used in the conclusion to argue for developmental subsidies (education/health) over freebies.
- **Diagrams & Presentation:** Underlined headings separating "populist tool" and "developing country necessary subsidies".

Question 15-

- **The Exact Question:** Harnessing public sector data is vital for informed decision making... highlight the various bottlenecks...

- **Examples Used:** PRAAPTI portal for coal; Manodarpan app; ONDC; Genome India project; BN Srikrishna Committee.
- **Context of the Example:** Shows real-time monitoring via PRAAPTI. ONDC shows democratizing commerce innovation.
- **Diagrams & Presentation:** Clear bullet points with "Eg >" callouts.

Question 16,

- **The Exact Question:** Why do Indian universities find it difficult to break into the ranks of top global universities?
- **Examples Used:** QS World University rankings; 0.7% of GDP research investment; Delhi University salaries.
- **Context of the Example:** Establishes the premise with QS rankings. Mentions DU specifically to highlight underpaid professors affecting motivation.
- **Diagrams & Presentation:** A bubble diagram mapping the 6 "Factors" needed to break into top ranks (Infrastructure, Placements, Professors, International Students, Research papers, Teacher-Student ratio).

Document 9: Ishita Kishore - GS Paper 3

Question 2

- **The Exact Question:** Imported inflation is compounding the challenges of post-pandemic recovery for the Indian economy. Discuss.
- **Examples Used:** Ukraine War.
- **Context of the Example:** Anchors the concept of imported inflation entirely in the contemporary geopolitical shock affecting fuel and supply chains.
- **Diagrams & Presentation:** A tree diagram showing "Causes" branching into Geopolitical crisis and Supply chain disruptions.

Question 5,

- **The Exact Question:** Space based technologies are helpful in not only monitoring development, but also enhancing it.
- **Examples Used:** GAGAN satellite; Smog over Delhi; GLOF in Uttarakhand; Mission Shakti ASAT; Elon Musk's universal internet; NSIL.
- **Context of the Example:** GAGAN for aviation accuracy. Uttarakhand GLOF for disaster resilience. ASAT for geopolitical strength.
- **Diagrams & Presentation:** Divided into "Role in monitoring" and "Role in enhancing". Numbered lists.

Question 8,

- **The Exact Question:** Managing risks, rather than impacts, lies at the core of effective disaster management strategy.

- **Examples Used:** India ranks 7th on Climate Risk Index; Kosi river; Mumbai, Hyderabad, Chennai urban floods; Kerala floods.
- **Context of the Example:** Kosi illustrates natural riverine flooding. City examples illustrate urban infrastructural flooding. Kerala illustrates flooding due to lack of preparedness.
- **Diagrams & Presentation:** An excellent map of India locating the specific types of floods regionally. Included a cyclic diagram for the "Sendai Framework" (Mitigation -> Preparation -> Execution -> Response).

Question 10,

- **The Exact Question:** Examine how advancements in technology has allowed organize crime syndicates to not only expand but also diversify their activities.
- **Examples Used:** Clubhouse used by terrorists; Whatsapp encryption; Golden Crescent & Golden Triangle; drones in Punjab.
- **Context of the Example:** Shows specific, modern tech tools (Clubhouse, drones) rather than generic "internet" arguments.
- **Diagrams & Presentation:** A linear timeline showing the evolution of tech aiding crime (1G pagers -> 2G messages -> 3G media -> 4G large media -> 5G huge data). A bubble map showing "Diversification of terrorists".

Document 10: Ishita Kishore - GS Paper 1 (Copy 2)

Question 1

- **The Exact Question:** Gandhian ideology secured democracy in the country even before it was formally established. Comment.
- **Examples Used:** Tolstoy Farm; JB Kripalani, Sarojini Naidu.
- **Context of the Example:** Tolstoy farm illustrates self-sufficiency and skilling. Mentioning Kripalani and Naidu proves the wide participation of different social strata.
- **Diagrams & Presentation:** Numbered bullet points with specific components of Gandhian ideology (Swaraj, Self-sufficiency, Sarvodaya).

Question 8

- **The Exact Question:** It is not the diversity, but threat to diversity that imperils the unity of the country. Comment.
- **Examples Used:** Indian Model vs France (secularism); Sri Lanka (exclusion of Tamil).
- **Context of the Example:** France's strict secularism is contrasted with India's positive involvement to show how accommodating diversity breeds unity. Sri Lanka's civil war is the prime example of how threatening diversity ruins unity.
- **Diagrams & Presentation:** A contrasting flowchart showing India vs France.

Question 14,

- **The Exact Question:** How is general pattern of ocean surface current circulation related to global atmospheric circulation patterns?
- **Examples Used:** Polar Easterlies, Westerlies, Trade Winds; Roaring 40's; Labrador, Kuroshio, Oyashio currents.
- **Context of the Example:** Applies the theoretical wind cells to specific real-world currents to demonstrate the cause-effect relationship.
- **Diagrams & Presentation:** Two highly technical diagrams: 1) A globe showing Polar, Ferrel, and Hadley cells with wind directions. 2) A world map detailing all major warm and cold ocean currents.

Question 18,

- **The Exact Question:** Population composition, rather than population size, is more critical determinant of development trajectory of a country...
- **Examples Used:** 60% of India in 15-59 age; Vayoshri Yojna; Amartya Sen's Capability Approach.
- **Context of the Example:** Data point (60%) proves demographic dividend. Vayoshri Yojna shows the burden of an aging dependent population. Sen is used to pivot the argument from sheer numbers to the quality/health of the population.
- **Diagrams & Presentation:** Draws two Population Pyramids side-by-side to contrast India (bottom-heavy, youthful) with Japan (top-heavy, aging).

Document 11: Ishita Kishore - GS Paper 3 (Copy 2)

Question 10

- **The Exact Question:** Money laundering undermines the integrity of the financial system and threatens national security...
- **Examples Used:** Nirav Modi; PMC scam; NSE Chairperson scandal.
- **Context of the Example:** Nirav Modi represents economic fugitives. PMC scam represents a fatal nexus between bureaucracy, politicians, and business. NSE scandal represents the creation of a trust deficit.
- **Diagrams & Presentation:** A simple triangle diagram illustrating the "fatal combination" nexus of Politics, Business, and Bureaucrats.

Question 12,

- **The Exact Question:** Discussing the reasons for high Non-Performing Assets (NPAs) in Indian banking sector, critically examine the utility of Insolvency and Bankruptcy Code (IBC)...
- **Examples Used:** Arvind Subramanian's 'Four Balance Sheet Problem'; Nirav Modi PNB scam; Bhushan Steel.
- **Context of the Example:** Subramanian's concept gives an expert economic framing. Bhushan steel is cited as a successful, systematic resolution under the IBC.

- **Diagrams & Presentation:** A linear flowchart tracing the lifecycle of a bad loan: Special Mention A/C -> NPAs -> Stressed Assets -> Written off.

Question 20

- **The Exact Question:** Explain the linkages of human trafficking with other illicit activities such as drug trafficking, gun-running, and terrorism.
- **Examples Used:** "Problem without a Passport".
- **Context of the Example:** Used to conceptually define the transnational nature of human trafficking.
- **Diagrams & Presentation:** A cycle diagram showing a "Vicious Cycle" where trafficked humans are coerced to carry drugs, fall into conflict with law, become habitual offenders out of fear, and eventually join terror groups.

Document 12: Ishita Kishore - GS Paper 2 (Copy 3)

Question 2

- **The Exact Question:** Just because a person is offended by someone's speech or word; it does not mean that an offence has been committed. In this context, discuss the issues surrounding the use of the section 295A and 153A of IPC.
- **Examples Used:** Charlie Hebdo in France; Prashant Bhushan's contempt of court; Priya Ramani vs MJ Akbar; Vinod Dua (sedition); Munawar Faruqui.
- **Context of the Example:** A rapid-fire listing of contemporary domestic and international incidents to illustrate the massive gray area between free speech and offensive speech.
- **Diagrams & Presentation:** A web/bubble diagram titled "Seen Recently" linking out to the 5 distinct examples.

Question 3,

- **The Exact Question:** Present a comparative analysis of political system of India and Sri-Lanka. How far do you agree that the reason for the economic crisis in Sri-Lanka lies in its political structure?
- **Examples Used:** 1991 crisis in India; Easter bomb attack; shift to organic farming.
- **Context of the Example:** Compares the separation of powers in India (which handled the 1991 crisis well) with the semi-presidential, family-influenced cabinet in Sri Lanka which suffered policy paralysis during the Easter attacks and the organic farming shift.
- **Diagrams & Presentation:** A clear two-column T-table comparing the Indian Parliamentary system vs the Sri Lankan Semi-Presidential system.

Question 4

- **The Exact Question:** The changed nature of civil society due to its professionalization has helped in deepening of democracy...
- **Examples Used:** FICCI and CII; Abhijit Banerjee (RCT), Jean Dreze; PUCL, ADR.

- **Context of the Example:** FICCI/CII represent organizational structure. Banerjee/Dreze represent intelligentsia guiding grassroots work. PUCL/ADR represent legal/political advocacy.
- **Diagrams & Presentation:** Underlined subheadings.

Question 6,

- **The Exact Question:** Policy of reservation, started to provide equality of opportunities, has fallen victim to political opportunism.
- **Examples Used:** Jat agitation; Justice Rohini Commission for sub-cat of OBC.
- **Context of the Example:** Jat agitation proves vote bank politics. Justice Rohini commission represents the administrative attempt to fix the concentration of benefits among a few communities.
- **Diagrams & Presentation:** A branching diagram explaining the "pressures of politicisation" (Vote bank politics -> Not a single community has overcome deprivation -> Increase in number of communities reserved -> Concentration of benefits).

Document 13: Ishita Kishore - Ethics

Question 1(a),

- **The Exact Question:** Ethical governance is the foundation of a welfare state. Identify essential ethical traits of a welfare state.
- **Examples Used:** I. Kant's categorical imperative; Kautilya's 'Yogkshema'; CAG audits in PDS; TRIFED; Beti Bachao Beti Padhao; Himmat App; Armstrong Pame; TN Seshan.
- **Context of the Example:** Kant and Kautilya provide profound philosophical and historical backing for the state's duty. The modern administrative examples (TRIFED, Himmat app, Seshan) prove how these ethics are operationalized via inclusivity, tech, and institutional innovation.
- **Diagrams & Presentation:** A pyramid diagram showing "Ethical governance" acting as the base supporting the "Welfare State" at the peak.

Question (Abortion)

- **The Exact Question:** While one group considers abortion as unmitigated evil, the other sees it as morally acceptable. Analyse...
- **Examples Used:** Christianity; Medical Termination of Pregnancy Act.
- **Context of the Example:** Used to frame the legal vs theocratic viewpoints on the right to life of the fetus.
- **Diagrams & Presentation:** Numbered bullet points under clear headings.

Question (Moral Myopia)

- **The Exact Question:** (Context: Differentiating Moral Myopia and Moral Muteness).

- **Examples Used:** Sacrificing environment endlessly for development; Nirbhaya rape case.
- **Context of the Example:** Environmental destruction shows myopia (short-sightedness ignoring long-term moral cost). Bystanders in the Nirbhaya case show moral muteness (silence despite recognizing the evil).
- **Diagrams & Presentation:** A two-column comparative table separating definitions, traits, and examples.

Question (Justice vs Force),

- **The Exact Question:** Justice without force is futile, force without justice is tyrannical.
- **Examples Used:** John Rawls; Jessica Lal case; Nirav Modi; British Raj; 9/11 attacks; war crimes in Syria.
- **Context of the Example:** Rawls establishes the primacy of "Right" over "Good". The British Raj and 9/11 are used to show "force without justice" leading to coercion and violence. Jessica Lal case represents society condemning injustice, requiring the force of law.
- **Diagrams & Presentation:** Boxed subheadings dividing the quote into its two halves.

Case Study: Tennis Player,,

- **The Exact Question:** Samuel is a famous tennis player... refuses to get vaccinated... lies in his affidavit.
- **Examples Used:** Novak Djokovic.
- **Context of the Example:** Explicitly points out the real-world equivalent to show that the ethical implications (role models misleading youth, public health risks) have actual historical precedent.
- **Diagrams & Presentation:** Stakeholders mapping showing Government, Pandemic affected populace, Samuel, Tournament organizers, and Fans.

Case Study: Demolition vs Environment,

- **The Exact Question:** (Context: Building constructed illegally, debate on demolition).
- **Examples Used:** Bhuvan-Ultra; CAMPA funds.
- **Context of the Example:** Suggests practical administrative alternatives to total demolition, like using compensatory afforestation and CAMPA funds based on Net Present Value.
- **Diagrams & Presentation:** A highly structured 3-part breakdown: I. Allow Residential tower to function, II. Leave building empty, III. The middle way. Uses bullet points to rapidly assess the moral hazard vs resource waste of each option.

Document 14: Pavan Datta - Essay

- **The Exact Question:** "Our deeds determine us as much as we determine our deeds."-

- **Examples Used:** Adolf Hitler vs Nelson Mandela; Gandhiji; King Dasharatha; India's 'No First Use' nuclear doctrine; Nolan principles for Civil Services.
- **Context of the Example:** The essay is built on contrasting examples. Hitler's hardships led to cruel deeds, defining him as a tyrant. Mandela and Gandhi faced similar hardships but their inherent values dictated peaceful deeds, defining them as great leaders. King Dasharatha is used as a mythological example of keeping a word/promise. India's nuclear doctrine is a macro-political example of a nation's deeds determining its identity as a responsible global power.
- **Diagrams & Presentation:** Pure paragraph format. Uses bold capitalization for quotes (e.g., ROBERT GREENE) and underlines key themes and examples.

Document 15: Preksha Agrawal - GS Paper 1

Question (Caste System)

- **The Exact Question:** Caste system is a dynamic reality that is acquiring a greater degree of flexibility in the modern society...
- **Examples Used:** Mandal Commission, Indra Sawhney; Kanshi Ram, BSP; Bhima Koregaon, Maratha reservation.
- **Context of the Example:** The examples trace the evolution from job reservations (Mandal) to outright political mobilization (BSP) to modern neo-caste assertions (Maratha).
- **Diagrams & Presentation:** A highly efficient two-column format. Left column: "Form of change" (e.g., Politicisation of caste). Right column: "Examples" (e.g., Rise of Kanshi Ram).

Question (Digital Tech & Gender)

- **The Exact Question:** Analyze the role of digital technologies in bridging gender gap in India.
- **Examples Used:** Blockchain for land records; Ujjwala Yojana DBT; Falguni Nayar; Bulli Bai App; PMDISHA.
- **Context of the Example:** Blockchain and DBT show systemic financial empowerment. The 'Bulli Bai App' is cited under "issues" to show how tech can amplify patriarchal harassment. PMDISHA is cited as a solution for digital literacy.
- **Diagrams & Presentation:** Numbered lists for benefits and issues.

Question 11 (Ancient Trade)

- **The Exact Question:** (Context: Economic activity in ancient India).
- **Examples Used:** Silk road, Spices, Horses, Cotton, Precious metals, Elephants/Ivory.
- **Context of the Example:** Identifies specific commodities traded and their geographical vectors to show the exchange of ideas and life.

- **Diagrams & Presentation:** Hand-drawn map of the Indian subcontinent and West/Central Asia, using arrows to depict the inward flow of horses/precious metals and outward flow of spices/cotton/ivory.

Question 14 (Deglobalization)

- **The Exact Question:** Identify and examine reasons behind the deglobalization wave...
- **Examples Used:** US refusal to grant H1B visa; BREXIT.
- **Context of the Example:** Real-world geopolitical shifts driven by protectionism.
- **Diagrams & Presentation:** A map of the world drawing boxes over regions indicating specific deglobalization events (e.g., a box over the US saying "US-Refusal to grant H1B visa", a box over Europe saying "BREXIT", a box over Africa/Middle East saying "Resistance against migrants").

Question 20 (Heatwaves)

- **The Exact Question:** What do you understand by heat waves? Identify the reasons...
- **Examples Used:** Chandigarh, Delhi (2021), Lucknow (2022).
- **Context of the Example:** Locating recent, severe weather events in urban centers to ground the answer in current affairs.
- **Diagrams & Presentation:** Includes a flowchart for "Criteria to identify" (Maximum temp -> Deviation from normal). Also includes a map of Northern India pointing to specific cities that experienced recent heat waves.

Document 16: Rahul Srivastava - GS Paper 1

Question 4 (Cloudbursts),

- **The Exact Question:** Why are hilly regions more vulnerable to cloudbursts? Describe their impact...
- **Examples Used:** Uttarakhand, Himachal Pradesh; Cherrapunji.
- **Context of the Example:** Recent rains claiming lives in these specific states justify the premise. Cherrapunji is used specifically to explain the "funneling effect" due to 3-sided mountains.
- **Diagrams & Presentation:** A horizontal tree diagram for "Impacts" splitting into Flash flooding, Lightning strikes, Damage to property, and Destruction of water sources/tourism.

Question 5 (Marine heat waves)

- **The Exact Question:** Explain the phenomenon of marine heat waves and their multi-dimensional impacts.
- **Examples Used:** El Nino, Polar vortex.

- **Context of the Example:** Used as the extreme weather events causing the greenhouse effect trap over oceans.
- **Diagrams & Presentation:** Hand-drawn map of global oceans (Pacific, Atlantic, Indian) with shaded circles explicitly identifying "Marine Heat Wave - Hotspots".

Question 14 (Ocean Currents),

- **The Exact Question:** How is general pattern of ocean surface current circulation related to global atmospheric circulation patterns?
- **Examples Used:** Labrador, North Atlantic, Gulf Stream, Canaries, Brazil, Benguela, Agulhas, Kuroshio, Oyashio, Peru.
- **Context of the Example:** Used to physically map the theoretical relationship between wind cells (Hadley, Ferrel) and ocean water movement.
- **Diagrams & Presentation:** 1) A world map detailing and naming major ocean currents, circling warm currents and leaving cold currents uncircled for differentiation. 2) A cross-section diagram of global atmospheric circulation showing cells and wind direction.

Question (Urban Vulnerability)

- **The Exact Question:** (Context: Urban cities vulnerable to adverse effects/pollution).
- **Examples Used:** East Kolkata wetlands, Yamuna in Delhi; Smog in Delhi/Beijing; Mumbai flash floods; Bokaro water-borne diseases.
- **Context of the Example:** Each specific urban disaster type is mapped to a specific city (e.g., industrial pollution to Bokaro, smog to Beijing/Delhi, runoff to Yamuna).
- **Diagrams & Presentation:** Numbered points with the specific disaster type boxed and the city example highlighted with an "ex:" tag.

Question 17 (Sugar Industry),

- **The Exact Question:** Account for the shift in location of sugar industry. What has been the economic and ecological consequences...
- **Examples Used:** FRP/SAP pricing; Tamil Nadu; Punjab; 2G bioethanol (E2025); Alfred Weber's theory of industrial location.
- **Context of the Example:** Tamil Nadu represents better recovery rates in the south. Punjab represents soil degradation due to monoculture (ecological consequence). Weber's theory is used in the conclusion to provide an academic geographic rationale for the shift.
- **Diagrams & Presentation:** A map of India using shading (slashes vs dots) to contrast "Traditional areas" (North) and "New areas" (South/West).

Question 18 (Population composition)

- **The Exact Question:** Population composition, rather than population size, is more critical determinant of development...
- **Examples Used:** India, China, Japan.

- **Context of the Example:** Used to represent the three stages of demographics: India (youthful/growth), China (middle/tapering), Japan (aging/falling development).
- **Diagrams & Presentation:** Hand-drew three distinct population pyramid shapes to visually prove the point: A triangle (India), a kite-shape (China), and an inverted teardrop/urn (Japan).

Document 17: Rahul Srivastava - GS Paper 2

Question 3 (India vs Sri Lanka),

- **The Exact Question:** Present a comparative analysis of political system of India and Sri-Lanka. How far do you agree that the reason for the economic crisis in Sri-Lanka lies in its political structure?
- **Examples Used:** King Asoka; Jaffna/Tamils; Covid-19 tourism drop, shift to organic farming.
- **Context of the Example:** Asoka establishes ancient cultural contacts. Jaffna shows minority mistreatment under the 13th amendment. Tourism and organic farming are cited as the *economic* (non-political) triggers for the crisis.
- **Diagrams & Presentation:** A clean T-chart comparing the political systems (India's De jure/De facto executive vs Sri Lanka's hybrid semi-presidential system).

Question 4 (Civil Society)

- **The Exact Question:** The changed nature of civil society due to its professionalization has helped in deepening of democracy...
- **Examples Used:** NAZ foundation, HelpAge India, KETO, Akshay Patra.
- **Context of the Example:** NAZ provides a voice to the voiceless (transgenders). HelpAge uplifts the marginalized. KETO shows modern technological fundraising. Akshay Patra shows social cause fulfillment (meals).
- **Diagrams & Presentation:** A structural equation diagram: "People <==> Civil Society <==> Government", showing civil society as the bridge.

Question 6 (Reservation),

- **The Exact Question:** Policy of reservation... has fallen victim to political opportunism. Critically examine the success of affirmative actions...
- **Examples Used:** Dr. BR Ambedkar quote (era of contradictions); 270 million people pulled out of poverty; Meenas in Rajasthan; Indra Sawhney and Nagaraj judgement.
- **Context of the Example:** Ambedkar provides the constitutional genesis. Meenas are cited as an example of "imbalanced growth" where repeated benefits are taken by a certain section. Nagaraj judgement is cited regarding reservations in promotions.
- **Diagrams & Presentation:** Bulleted lists with underlined keywords and boxed examples.

Question 9 (China-Russia)

- **The Exact Question:** China's interest in Russia is not only that of a strategic partner, but also for it being a strategic diversion for the west.
- **Examples Used:** Rajiv Sikri's book "India's foreign strategy"; 'Power of Siberia' pipelines; Arctic access; Ukraine War; Taiwan.
- **Context of the Example:** Rajiv Sikri is quoted to show common political ideologies but different development paths. 'Power of Siberia' shows energy diplomacy. Ukraine and Taiwan are linked to show how Russia acts as a buffer/distraction against Western sanctions.
- **Diagrams & Presentation:** Subheadings separate "Strategic partner" factors from "Strategic diversion" factors.

Question 11 (Electoral Reform)

- **The Exact Question:** Electoral reform is a continuous effort to make election funding transparent... proposal for remote voting...
- **Examples Used:** Dinesh Goswami committee; N.N. Vohra (NK Singh) Report; Electoral bonds; Indrajit Gupta committee; Blockchain technology.
- **Context of the Example:** Goswami committee highlights the paradox of democracy and opaque funding. Vohra report highlights the criminal-political nexus. Gupta committee is cited for state funding proposals. Blockchain is suggested for remote voting security.
- **Diagrams & Presentation:** Numbered points with arrows linking the problem to the proposed solution.

Question (MGNREGA),

- **The Exact Question:** (Context: MGNREGA performance and replicating in urban areas).
- **Examples Used:** Meghalaya (social audit); Adhaar based DBT; CAMPA funds; Amartya Sen's Capability approach.
- **Context of the Example:** Meghalaya is cited for mandatory structural inspections. CAMPA funds show budget crunches. Sen's approach justifies the scheme as providing the right to life with dignity.
- **Diagrams & Presentation:** A T-table explicitly comparing "AYES" and "NOES" for replicating MGNREGA in Urban Areas.

Document 18: Waseem Ahmad Bhat - GS Paper 2

Question 2 (Hate speech)

- **The Exact Question:** Just because a person is offended by someone's speech or word; it does not mean that an offence has been committed. Discuss issues surrounding section 295A and 153A of IPC.
- **Examples Used:** Salman Rushdie 'attempt to murder' case; Lal Singh Chadha movie bans; Kedarnath case; Romesh Thapar case; Shreya Singhal case.

- **Context of the Example:** Rushdie and movie bans show current intolerance. Kedarnath, Romesh Thapar, and Shreya Singhal are landmark Supreme Court cases used to legally prove that speech is not an offense unless it incites violent means.
- **Diagrams & Presentation:** Purely paragraph-based, relying heavily on underlining the names of the legal cases to draw the evaluator's eye to the evidence.

Question 3 (India vs Sri Lanka),

- **The Exact Question:** Comparative analysis of political system of India and Sri-Lanka. How far do you agree that the reason for the economic crisis in Sri-Lanka lies in its political structure?
- **Examples Used:** K.C. Wheare (quasi-federal); Tamil minority; sudden move to 'organic farming'.
- **Context of the Example:** Wheare is used to describe India's federal structure as opposed to Sri Lanka's unitary structure, which led to Tamil alienation. Organic farming is cited as the abrupt policy trigger for the economic collapse.
- **Diagrams & Presentation:** A two-column comparative table contrasting India's Parliamentary/Federal system with Sri Lanka's Presidential/Unitary system.

Question 9 (China-Russia),

- **The Exact Question:** China's interest in Russia is not only that of a strategic partner, but also for it being a strategic diversion for the west.
- **Examples Used:** 'Power of Siberia' pipelines; Arctic access; Belt and Road Initiative (BRI); QUAD; Russia-Ukraine war; Taiwan.
- **Context of the Example:** Siberia pipeline and Arctic oil show strategic resource partnership. QUAD, Ukraine, and Taiwan show the geopolitical chess game where China uses Russia as a buffer against Western sanctions.
- **Diagrams & Presentation:** Numbered bullet points categorized under two main heading arrows: "=> China's interest: As a strategic partner" and "=> China's interest: As a diversion for west".

Question 11 (Electoral reform)

- **The Exact Question:** (Context: Electoral funding, remote voting, de-registering parties).
- **Examples Used:** Section 29 of RPA; Indrajit Gupta committee; Blockchain technology; ECI de-registering parties.
- **Context of the Example:** Recommends amending RPA to disclose donations above ₹20,000. Cites Gupta committee to advocate for a cap on state funding. Proposes blockchain for secure remote voting.
- **Diagrams & Presentation:** Flowchart logic using arrows (e.g., Indrajit Gupta committee -> State funding -> cap on funding -> Transparency).

Question (Ordinances)

- **The Exact Question:** (Context: Misuse of ordinances bypassing legislative scrutiny).
- **Examples Used:** D.C. Wadhwa case; Bihar state ordinances; Krishna Kumar Case.

- **Context of the Example:** D.C. Wadhwa establishes that ordinances shouldn't be parallel legislation. Bihar is cited as a state frequently misusing this power (re-promulgation). Krishna Kumar case is cited to call this a "fraud on the Constitution."
- **Diagrams & Presentation:** Highly effective use of boxed legal cases embedded within the sentences.

Question 18 (Women workforce anomaly),

- **The Exact Question:** Poverty is driving women into the workforce, while education seems to drive them out of it. What explains this anomaly?
- **Examples Used:** PLFS data (GER up to 48%, but LFPR dropped to 22%); Small & marginal farmers.
- **Context of the Example:** Uses PLFS data in the intro to empirically prove the premise. Small farmers are cited to explain the "Compensatory labour" system where poverty forces women to work.
- **Diagrams & Presentation:** Draws a U-shaped graph plotting "LFPR" against "Education" to visually depict the "Feminisation U-hypothesis".

Document 19: Waseem Ahmad Bhat - Ethics

Question 1 (Adversity quotient),

- **The Exact Question:** Successful people are not those who did not fail, but those who persisted... examine the importance of adversity quotient in life. How can it be developed?
- **Examples Used:** Elon Musk's SpaceX; Gandhiji in Africa; A.P.J. Abdul Kalam; Armstrong Pame; Jocko Willink; Ashley Vance; Talisman of Gandhiji; Iqbal.
- **Context of the Example:** Musk, Gandhi, and Kalam are used as archetypes of persistence despite failure. Pame shows maintaining a positive attitude (crowdfunding). Willink ('Extreme ownership') and Vance (biographies) are cited as methods to develop this quotient.
- **Diagrams & Presentation:** A mind-map style box on the left ("Examples that depict this truth") branching out into three specific mini-paragraphs for Musk, Gandhi, and Kalam.

Question (Strength and Will),

- **The Exact Question:** 'Strength does not come from physical capacity but from an indomitable will.' - Gandhi.
- **Examples Used:** British military vs Gandhiji; Internalisation of patriarchy; Ho Chi Minh.
- **Context of the Example:** The British retreat proves will overcoming physical force. Patriarchy is cited to show that the "enemy" is often mental, not physical. Ho Chi Minh is used as a nuanced counter-example to show that physical force is sometimes necessary against adversaries who don't respect non-violence.

- **Diagrams & Presentation:** Numbered bullet points emphasizing key phrases like "mental obstacle".

Question 3(a) (Civil service activism),

- **The Exact Question:** An active civil service is necessary but not sufficient; India also requires civil service activism...
- **Examples Used:** Sardar Patel ("Steel frame"); TPDS under NFSA; Section 144; Byju's/Edtech startups; Gandhiji.
- **Context of the Example:** Patel sets the baseline. NFSA and Sec 144 show active implementation. Edtech startups are cited in a later sub-question regarding digital education needing a shift from profit to moral education.
- **Diagrams & Presentation:** Boxed names and concepts embedded in bulleted points.

Question (Public vs Private work culture),

- **The Exact Question:** How are ethical concerns and work culture of public institutions different from those of private institutions?
- **Examples Used:** Nolan Committee, 2nd ARC; Elton Mayo's ideas; Sarathi initiative; Aruna Sundararajan.
- **Context of the Example:** Nolan and 2nd ARC dictate public ethics (transparency). Elton Mayo dictates private culture (innovation, team spirit). Sundararajan is cited as an example of successfully bringing private-sector innovation into the public IT department of Kerala.
- **Diagrams & Presentation:** Two large comparative T-tables: One for "Ethical concerns" (Public vs Private) and one for "Work culture" (Public vs Private).

Question 5(a) (Empathy and compassion),

- **The Exact Question:** Besides objectivity, civil servants also need empathy and compassion to effectively resolve various ethical dilemmas...
- **Examples Used:** EIA; U. Sagayam; Sarvodaya by Gandhiji; 2nd ARC.
- **Context of the Example:** EIA shows objective due diligence. Providing ration by manual override shows empathy bypassing strict rules. U. Sagayam eradicating the land mafia shows compassion leading to public trust.
- **Diagrams & Presentation:** Numbered lists with circled bullet points and underlined examples.

Question (Leadership and persuasion),

- **The Exact Question:** Leadership is essentially a task of persuasion... Identify five qualities that make civil servants effective agents of persuasion.
- **Examples Used:** Elon Musk; Satish Dhawan; Amit Gupta; Malegaon DC; Syed Sehrish Asgar; Chetan Singh Rathore; Aristotle.
- **Context of the Example:** Dhawan persuaded juniors to work hard. Amit Gupta motivated colleagues. Malegaon DC stopped communal riots. Asgar changed

attitudes on menstrual hygiene. Rathore used emotional intelligence (singing national anthem) to pacify crowds.

- **Diagrams & Presentation:** Branching diagram linking "Leadership and persuasion" to specific personalities (Musk, Dhawan).

Question (Peace vs Justice),

- **The Exact Question:** (Context: Unjust peace vs fighting for justice).
- **Examples Used:** Slavery of blacks / American Civil war; Sarvodaya; Stalin; Nelson Mandela; Greta Thunberg; Medha Patkar; I. Kant.
- **Context of the Example:** The American Civil War is used to prove that "peace without justice" is a boiling pot that leads to war. Stalin represents the danger of being a silent spectator. Thunberg and Patkar represent modern fighters against climate injustice and majoritarianism.
- **Diagrams & Presentation:** Numbered bullet points, heavily relying on philosophical quotes (Kant) for the conclusion.

Case Study: Illegal Mining-

- **The Exact Question:** (Context: SP forms a task force against illegal mining, faces political pressure and threats to family).
- **Examples Used:** Deepika Gupta (similar case study reference); Venkatachaliah.
- **Context of the Example:** Mentions the Deepika Gupta study to show awareness that lower castes/local officials are often targeted. Venkatachaliah is cited regarding the deterrence effect of certainty of punishment.
- **Diagrams & Presentation:** A "Stakeholders" bubble map centrally locating the SP, surrounded by Politicians, Mafia, Locals, Task force, and Family.

Case Study: MDM Food Poisoning,

- **The Exact Question:** (Context: Dalit cook blamed for food poisoning caused by contractor linked to a minister).
- **Examples Used:** Whistleblowing Act; Gandhiji; Aristotle; Venkatachaliah.
- **Context of the Example:** Uses ethical thinkers to justify actions: Gandhiji (conscience is the highest court), Aristotle (do what is right, not what is established).
- **Diagrams & Presentation:** Stakeholders bubble map.

Case Study: Dalit Sarpanch-

- **The Exact Question:** (Context: Dalit Sarpanch discriminated against by Panchayat secretary, forced to sit on floor, not allowed to hoist flag).
- **Examples Used:** Ambedkar; Mahad Satyagraha; Vivekananda.
- **Context of the Example:** Cites the lack of "social democracy" at the base as warned by Ambedkar. The Sarpanch is advised to ask for security and demand rights, drawing parallel to Ambedkar's Mahad Satyagraha.

- **Diagrams & Presentation:** A highly effective 3-column table analyzing the final part of the question: Stakeholder -> Responsibilities -> Examples (e.g., Public -> Change attitudes -> Get rid of superstitions as per Vivekananda).

Case Study: Career vs Family,

- **The Exact Question:** (Context: Female employee faces dilemma of leaving a promotion/dream job to move with her husband).
- **Examples Used:** Oberoi (feminist scholar); Satish Dhawan; Ambedkar and Ramabai.
- **Context of the Example:** Oberoi is cited to highlight the patriarchal nature of the problem. Dhawan is cited as an example of keeping professional and private life separate. Ambedkar and Ramabai are cited to show how a husband should support a wife's opportunities (Gender-sensitivity).
- **Diagrams & Presentation:** A T-table evaluating the first option ("Leave the job and move") by listing its Merits and Demerits.

Document 20: Kanika Goyal - GS Paper 3

Question 1

- **The Exact Question:** Employment problems of rural and urban areas differ in nature, but their solutions are interdependent and interrelated. Analyze.
- **Examples Used:** PLFS data (2021-22) for WPR (~43%) and LFPR (~39%); Urban unemployment (~7%), Rural unemployment (~5%); COVID-19 retrenchment; Industrial Revolution 4.0; Average rural salary (**~**₹6000-7000); 49% graduates unemployable.
- **Context of the Example:** The candidate opens with a barrage of hard PLFS statistics to establish a factual, objective baseline. The mention of IR 4.0 and COVID-19 perfectly encapsulates the modern urban employment crisis, while the average salary data highlights the "forced/disguised" nature of rural employment.
- **Diagrams & Presentation:** Distinctly separated the problem into numbered and circled subheadings ("1. Urban youth", "2. Rural employment").

Question 2

- **The Exact Question:** Why has Hybrid Annuity Model (HAM), which was earlier proposed as a game-changer in Public Private Partnerships (PPP), received lukewarm response from private developers? What are the alternate PPP models that can be pursued for encouraging private investments?
- **Examples Used:** HAM ratio (60% upfront, 40% annual); Build Operate Transfer (BOT) model (~90% usage before HAM); EPC Model (Delhi Metro); Swiss Challenge; National Infrastructure Pipeline (NIP) and Gati Shakti (₹102 Lakh Cr target).

- **Context of the Example:** Delhi Metro is cited as a highly successful real-world execution of the alternative EPC model. NIP and Gati Shakti are strategically mentioned in the transition paragraph to highlight the macro-economic urgency of fixing PPP models.
- **Diagrams & Presentation:** Uses text boxes with arrows pointing outward to explain *why* HAM was a game-changer (e.g., arrow pointing to "working capital with private"). Underlines specific alternative models for easy visibility.

Question 3

- **The Exact Question:** Imported inflation is compounding the challenges of post-pandemic recovery for the Indian economy. Discuss.
- **Examples Used:** Crude oil price increase (~70%); CPI(C) inflation ~7%; WB/IMF growth projections lowered to ~8% and 7.5%; Semi-conductor shortage due to Chinese lockdown; Global wheat shortage; European inflation (~20%), American inflation (~8-9%); Repo rate hikes (~150bps).
- **Context of the Example:** The "Chinese lockdown" specifically illustrates supply-chain disruption. European and American data sets the global context, proving the inflation is truly "imported." The repo rate hike is cited as the specific domestic policy response by the RBI.
- **Diagrams & Presentation:** *Crucial Strategy extracted here:* Draws a highly effective, rough world map titled "Major areas fuelling inflation." She draws arrows pointing from the US (Fed Reserve price), Russia/Ukraine (Ukraine crisis), Middle East (Crude oil gas), and South East Asia (Palm oil) directly toward India.

Question 4

- **The Exact Question:** Inclusive growth is both a process and an outcome. Discuss in Indian context.
- **Examples Used:** PM-Garib Kalyan Yojana; Mid Day Meal; PM-Kaushal Vikas Yojana; Bharatmala and Sagarmala; BharatNet; PM Jan Vikas Karyakram; 270 million out of poverty (2005-2016).
- **Context of the Example:** Specific schemes are mapped directly to specific dimensions of inclusion: PM-GKY for social security, Bharatmala for infrastructural equity, PM-KVK for upward mobility/skilling, and the 270m data point acts as the empirical proof of the "outcome."
- **Diagrams & Presentation:** A circular hub-and-spoke bubble diagram linking a central "IG" (Inclusive Growth) node to its dimensions: "Rural-urban divide", "Gender equity", "Rich-Poor divide", "Sectoral equity", "Environmental sustainability", and "Institutional equity". Uses boxed subheadings for "[As a process]" and "[As an outcome]".

Question 5

- **The Exact Question:** A very small fraction of the adult population files tax returns and an even smaller portion pays taxes. In light of this observation, examine reasons for poor tax compliance in India. Also, suggest measures to improve income tax code in the country.

- **Examples Used:** MSME rules promoting "dwarf enterprises"; Wealth tax abolition (2016); Faceless assessment; GST trail; Demonetisation receipts; Bank Mitras.
- **Context of the Example:** MSME rules are cited as an unintended policy loophole where companies intentionally stay small (dwarf) to evade taxes. GST trails and Faceless assessments are cited as modern, tech-driven deterrence methods.
- **Diagrams & Presentation:** Uses a branching bracket under "Steps taken" to organize the government's dual approach (Branch 1: Honoring the honest; Branch 2: Utilisation of GST trail).

Question 6

- **The Exact Question:** Evaluate the potential of Pradhan Mantri Matsya Sampada Yojana (PMMSY) to meet the goals of the Blue Economy and Neel Kranti mission.
- **Examples Used:** Fishery sector growth ~11%, ~15% contribution to agriculture exports; Kisan Credit Card (KCC); Farmer Producer Organisations (FPO); Sagarmala.
- **Context of the Example:** Begins with hard economic data to justify the sector's importance. Uses the integration of fishermen into KCC and the logistical integration with Sagarmala to show how the scheme does not operate in a vacuum.
- **Diagrams & Presentation:** Clean numbered lists under underlined headings outlining "Aims", "Potential for Blue Economy", and "Neel Kranti Mission".

Question 7

- **The Exact Question:** The Horticulture sector, though has potential to transform agriculture landscape of country, is beset with several challenges. Discuss.
- **Examples Used:** "Cycle of onion prices"; Wheat and rice dominating ~53% of total cropped area; PM-Fasal Bima Yojana; Operation Green (TOP to Total 22 perishable crops); Paramparagat Krishi Vikas Yojana.
- **Context of the Example:** The "cycle of onion prices" is a brilliant micro-example used to perfectly illustrate the lack of cold chain infrastructure. The 53% wheat/rice dominance is cited to highlight the structural hurdle (MSP procurement bias) preventing farmers from diversifying into horticulture.
- **Diagrams & Presentation:** A linear flow diagram mapping the onion cycle across months: (Sep peak -> Oct crop minimal -> March start -> Sep peak) to visually depict extreme price volatility.

Question 8

- **The Exact Question:** Food Processing sector must be developed as one of the principal industries in the country for reasons that go beyond agriculture. Elucidate.
- **Examples Used:** PLI scheme; ~16% contribution to Manufacturing GDP; ~13% of exports; PM-SAMPADA; NABARD; One district One product (ODOP); PM-POSHAN Abhiyan.
- **Context of the Example:** PM-POSHAN is uniquely cited as a forward linkage (providing breakfast meals and ready-to-eat food to schools), showing how food processing has social dimensions beyond just agricultural economics.

- **Diagrams & Presentation:** Relies heavily on rapid bullet points and underlining key schemes.

Question 9

- **The Exact Question:** What do you understand by natural farming? How can it help in building climate resilient agriculture?
- **Examples Used:** Zero Budget Natural Farming (by Subhash Palekar); Budget 2022-23 mandate for a 5km ZBNF crop corridor around River Ganga; Beejamrit and Jeevaamrit (Cowdung + Urine + Jaggery).
- **Context of the Example:** Mentions the specific Budget 2022-23 policy to ground the theoretical concept in the latest administrative reality. Mentioning Beejamrit and its components provides technical, on-ground depth to the definition.
- **Diagrams & Presentation:** Standard numbered bullet points.

Question 10

- **The Exact Question:** In light of National Mission on Edible Oils-Oil Palm (NMEO-OP), critically examine economic and environmental implications of promotion of oil palm cultivation in the country.
- **Examples Used:** Yellow Revolution (1985); Import bill breakdown (~90% palm oil, ~80% sunflower, ~30% groundnut); PM-DevINE; Indonesia (biodiversity impact).
- **Context of the Example:** PM-DevINE is linked to the economic implication of creating infrastructure and jobs in the North East. Indonesia is cited as a cautionary international case study demonstrating the environmental ruin caused by palm oil monoculture.
- **Diagrams & Presentation:** Explicitly boxed subheadings: [Economic Implications] and [Environmental Implications].

Question 11

- **The Exact Question:** Achievement of a 400 billion USD merchandise export is a result of concerted and collective efforts towards an Atmanirbhar Bharat. Identify various factors responsible for this feat. What measures will you suggest to place India at the centre of global supply chains?
- **Examples Used:** $253 bn service exports; "Pharmacy of the world" post-COVID; Russia-Ukraine war; PLI (4-6% concessions); Record FDI; Defence exports to Philippines/Vietnam; Corporate tax reform (~22% to 15%); RoDTEP; SCRI; FTA (Australia-UAE); GATI-SHAKTI; APEDA (GI tagged foods).
- **Context of the Example:** The Russia-Ukraine war is pinpointed as the specific driver for expensive petroleum exports from Gujarat. Defence exports to Vietnam/Philippines are cited to show India's diversification beyond traditional goods.
- **Diagrams & Presentation:** A bubble flowchart titled "Fig: Measures taken by India" linking the core "Atmanirbhar Bharat" node to specific policies (PLI, RoDTEP, SCRI, FTAs).

Question 12

- **The Exact Question:** Supporters of the universal basic income present it as a cure for poverty while few opponents call it a worse disease for the economy. Which view do you subscribe to? Explain your stand.
- **Examples Used:** PDS ghost beneficiaries/exclusion errors; SEWA study in MP; PM-Jan Dhan transfer of ₹500 during COVID-19; V-shaped vs K-shaped recovery.
- **Context of the Example:** The SEWA study in MP is a critical piece of empirical evidence used to prove the positive multi-dimensional impact of UBI (showing 2x increase in ag-production and women empowerment). The ₹500 Jan Dhan transfer is cited as a real-world, successful proto-UBI tested during the pandemic.
- **Diagrams & Presentation:** Boxed headings for "[Arguments in support]" and "[Arguments against]".

Question 13

- **The Exact Question:** The 1991 economic reforms provided a leap forward and lifted millions out of poverty; however, comprehensive structural reforms remain incomplete resulting in sectoral imbalances and heightened inequalities. Comment.
- **Examples Used:** Growth to a 3 Trillion economy; Top 1% owning ~70% of wealth; 60% GDP coming from cities vs 6 lakh villages; FLFPR at ~23%; SEZ failure; NHP 2017; NEP 2020; PM-Kaushal Vikas Yojana; Open Networks for Digital Commerce (ONDC).
- **Context of the Example:** Uses the hard wealth concentration data (1% owning 70%) to empirically prove the "heightened inequalities" prompt. ONDC is cited as the cutting-edge "Reform 2.0" required for democratizing the trade/services sector.
- **Diagrams & Presentation:** *Exceptional Presentation extracted here:* Draws a highly effective matrix/table comparing Sector, GDP share (1991), Labour share (1991), GDP share (2021), and Labour share (2021) for Agriculture, Industry, and Services. This instantly and visually proves the "sectoral imbalance" argument to the examiner without requiring long paragraphs.

Question 14

- **The Exact Question:** Despite a focused approach on manufacturing sector through initiatives such as Make in India, the share of manufacturing sector... has stayed stagnant. Bring out the reasons... suggest reforms to meet targets of National Manufacturing Policy 2011.
- **Examples Used:** Stagnation at ~15% share; 96% of MSMEs are micro enterprises; Minimum Alternate Tax (MAT) and sunset clause (Budget 2015-16) hurting SEZs; "Assemble in India"; Bimal Jalan Committee; ULPIN; PM-MITRA.
- **Context of the Example:** Rephrases "Make in India" as "Assemble in India" to critically evaluate the reality of current manufacturing value addition. Cites the Bimal Jalan Committee for export guidelines and PM-MITRA for formalizing the textile sector.
- **Diagrams & Presentation:** Bullet points with underlined keywords.

Question 15

- **The Exact Question:** Fintech is facilitating financial inclusions through innovations, but reaping its developmental potential requires overcoming critical hurdles. Analyze.
- **Examples Used:** IR 4.0 hub at GIFT City Gujarat; 44 crore Jan Dhan accounts (68% owned by women); 1.26L bank network; SWIFT Networking; DarkNet; CERT-In and NCIIPC; Digital crony lenders in Andhra Pradesh/Telangana; NSE and BSE Colocation problems.
- **Context of the Example:** Mentions GIFT City to show physical infrastructure pushing fintech. Specifically names Andhra/Telangana to geographically contextualize the "digital crony lender / fake apps" menace. The NSE colocation problem is a sophisticated example of technical glitches causing systemic financial vulnerability.
- **Diagrams & Presentation:** Circled numbers for hurdles, and underlined key phrases.

Question 16

- **The Exact Question:** Encouraging livestock through mixed farming can be the answer to the triple burden of low farm income, increasing land fragmentation and plummeting productivity... Discuss.
- **Examples Used:** NITI Aayog data on sustained income in Haryana, Punjab, AP, Gujarat; ~₹40000 average loan on 54% of farmers; Aquaponics; Foot and Mouth Disease, Brucellosis, Lumpy skin disease (~23000 cattle deaths recently); Rashtriya Pashu Abhiyan.
- **Context of the Example:** Mentions "Lumpy skin disease" and specific cattle death statistics to brilliantly highlight the contemporary disease vulnerability of livestock rearing. Aquaponics is used to show an innovative method of increasing productivity by integrating fisheries and agriculture.
- **Diagrams & Presentation:** A circular flow diagram demonstrating "Mixed farming involves" with arrows pointing to Agriculture + Dairy/Poultry/Fishery.

Question 17

- **The Exact Question:** Explain the relationship between land reforms and agricultural productivity. Also, discuss various difficulties in designing and implementation agriculture friendly land reforms...
- **Examples Used:** ~85% small and marginal farmers (<2ha); Kerala and Bihar successful implementation; Farmer suicides specifically in Marathwada, Hyderabad, Telangana; SWAMITVA scheme; LARRA 2013; Forest Rights Act.
- **Context of the Example:** Kerala and Bihar are cited as the rare success stories of historical land reform. Marathwada and Telangana are used as geographic examples of areas suffering from poor productivity leading to agrarian distress. SWAMITVA is cited as a modern technological solution to land titling.
- **Diagrams & Presentation:** A bracket diagram breaking the core concept of "land reforms" into four nodes: land consolidation, tenancy reforms, zamindari abolition, and land ceiling.

Question 18

- **The Exact Question:** Community institutions in agriculture offer small farmers an opportunity to increase their productivity... enumerate the various challenges faced by the Farmers Producer Organisations (FPO's)...
- **Examples Used:** Budget 2021-22 proposal (10,000 FPOs by 2026); e-NAM, e-Rakam, e-Krishi portal; Krishi Vigyan Kendras.
- **Context of the Example:** Starts directly with the exact budgetary target for FPOs to demonstrate strong administrative awareness. Recommends linking FPOs with specific existing tech platforms like e-NAM and e-Rakam to solve market access challenges.
- **Diagrams & Presentation:** Standard bullet points and numbered lists.

Question 19

- **The Exact Question:** The fundamental problem in agriculture is not the availability of resources, but their inefficient use. Comment.
- **Examples Used:** Rice and sugarcane consuming ~70% of water; 90% groundwater used in agriculture; 24/7 free electricity policy; Ideal fertilizer ratio 5:2:1 versus actual skewed 11:7:1; PM-Krishi Sinchai Yojana ("Per drop more crop"); Millets.
- **Context of the Example:** The 11:7:1 fertilizer ratio is a precise data point that perfectly illustrates the "inefficient use" of resources (the massive urea bias). The 70% water use by just two crops proves the lack of crop diversification. Millets are suggested as the "crops of the future" due to their water efficiency.
- **Diagrams & Presentation:** A central bubble titled "Resources required" branching out to Machinery, Pesticides, Seeds, Fertilizer, and Water, serving as an index for the ensuing paragraphs.

Document 21: Kanika Goyal - Ethics

Question 1(a)

- **The Exact Question:** "Ethics is not just a contemplative discipline. What we believe to be good or bad has implications on our actions." Discuss how different schools of ethics help us in making moral decisions.
- **Examples Used:** Socratic philosophy ("Know thyself"); Kantian "Categorical Imperative"; Google's HR policy ("Google for Googlers"); Climate justice and global warming.
- **Context of the Example:** "Google for Googlers" is used as an excellent modern corporate manifestation of Kant's categorical imperative (treating employees as ends in themselves, doing onto others what you expect).
- **Diagrams & Presentation:** Uses mini-flowcharts to link concepts (e.g., As a contemplative -> thinking of Meta-Reality / thinking in abstraction).

Question 1(b)

- **The Exact Question:** While one group considers abortion as unmitigated evil, the other sees it as morally acceptable. Analyse various ethical concerns related to abortion and give your opinion on the issue.

- **Examples Used:** US Supreme Court overturning Roe V/s Wade; 'My body, My life, My choice'; Christian ethics (Basis for ban in Malta); Medical Termination of Pregnancy Act 1971; Joseph Shine case (Bodily integrity); PCPNDT Act.
- **Context of the Example:** Malta is cited as an international example of theological bans on abortion. The Joseph Shine case is strategically used as a legal precedent to support women's bodily integrity and autonomy in India.
- **Diagrams & Presentation:** A highly organized T-table directly comparing arguments "For abortion (Pro-choice)" alongside "Against Abortion (Pro-life)".

Question 2(a)

- **The Exact Question:** What lessons can be learnt from the life of Mahatma Gandhi for promoting social harmony in today's times?
- **Examples Used:** Einstein quote on Gandhi; Fast at Red Fort; Article 17 (Untouchability); Triple Talaq judgement; Noakhali riots; Jinnah's Two Nation Theory.
- **Context of the Example:** Noakhali is cited as the prime historical example of breaking silos to establish peace through grassroots conversation. Triple Talaq and Art 17 are used as modern examples of eliminating orthodoxy within one's own religious group, echoing Gandhi's social reform methods.
- **Diagrams & Presentation:** Boxed heading "[Lessons to be learnt]". Embedded examples utilize an "Eg ->" tag for quick visibility.

Question 2(b)

- **The Exact Question:** What is Kant's categorical imperative? How does it compare with the doctrine of Nishkama Karma?
- **Examples Used:** Krishna asking Arjuna to not stop and run away from war (Gita Chapter 2, shloka 39).
- **Context of the Example:** The specific Gita reference illustrates Nishkama Karma's focus on completing one's worldly duty regardless of consequence, contrasting it with Kant's focus on universal rules.
- **Diagrams & Presentation:** Uses a formulaic flowchart representation to summarize Kant: "Thus it is a -> Deontological philosophy -> Universally applicable -> Happiness for all".

Question 3(a)

- **The Exact Question:** Emotional intelligence (EI) not only helps in managing stress but also transforms distress into eustress. Elaborate with relevant examples.
- **Examples Used:** OP Chaudhary, IAS (Nyay Jyoti in Naxal areas); Gyanvapi case judgement (allowing both sides to pray); Elon Musk motivating employees; Satish Dhawan and Dr Kalam at ISRO; Ashokan Dhamma post Kalinga; Serena Williams at recent US Open.
- **Context of the Example:** OP Chaudhary is an outstanding civil service example of using EI for conflict management in a high-stress red corridor zone. Serena Williams is cited for her ability to shed negativity and perform. Dhawan and Kalam represent

building team rapport and absorbing failure (translating distress to eustress for juniors).

- **Diagrams & Presentation:** Underlines names of personalities and boxes the main concepts.

Question 3(b)

- **The Exact Question:** Differentiate between the following: i. Gratitude and Gratification. ii. Moral myopia vs Moral muteness.
- **Examples Used:** Padma Shri awardee Subasini Mistry (gratitude to God allowing her to contribute to a hospital); Dalai Lama; Mahmood Mamdani (world silent on 3 lakh Tutsis killed in 1990s); Martin Luther King Jr; Afghan ministers faking jokes in Europe post Taliban capture.
- **Context of the Example:** Subasini Mistry provides a highly specific, touching Indian example of deep gratitude. The Tutsi genocide (Mamdani) is used as a horrific historical example of international moral muteness. Afghan ministers joking while their country fell is used as a poignant contemporary example of moral myopia (short-sighted selfishness).
- **Diagrams & Presentation:** Uses two distinct T-tables to lay out the differences clearly.

Question 4(a)

- **The Exact Question:** Although attitude and behaviour are interrelated, the former is a predisposition while the latter is an option. Discuss the structure of attitude and explain the relationship between attitude and behaviour.
- **Examples Used:** Socrates ("know thyself"), Vivekanand (Neo-Vedantism); Recent killing of Dalit boy in Jalore (banality of discrimination); Shehzad & Saud (self-taught animal vets in Delhi); Chinese aggression in Taiwan strait.
- **Context of the Example:** The Jalore incident is used to show the tragic behavioral manifestation of a discriminatory cognitive attitude. Shehzad & Saud illustrate the affective/emotional component (love for animals translating to action). The Taiwan strait example shows how a state 'reacts' behaviorally to geopolitical stimuli.
- **Diagrams & Presentation:** A bracket diagram mapping the CAB model (Cognitive, Behavioural, Affective). Also includes a T-table comparing Attitude and Behaviour side-by-side.

Question 4(b)

- **The Exact Question:** Greed is a bottomless pit which is harmful not only for self but for the entire society. Discuss. How can such negative desires be controlled?
- **Examples Used:** Edmund Burke quote; Machiavelli and Hobbes; PM at COP26 (Recycle-Reuse/Zero waste lifestyle); Bhutan Gross National Happiness index.
- **Context of the Example:** Hobbes and Machiavelli are used to provide the academic/philosophical basis of human greed. The PM's COP26 speech and Bhutan's index are provided as macro-level socio-political solutions to control societal greed (rampant consumerism).

- **Diagrams & Presentation:** Quotes are highlighted with quotation marks. Structured with numbered lists.

Question 5(a)

- **The Exact Question:** A man can give up a right, but he may not give up a duty without being guilty of a grave dereliction.
- **Examples Used:** Aristotle quote ("he is either beast or from some other world"); Rabindranath Tagore quote.
- **Context of the Example:** Argues that a terrorist giving up his right to civilized treatment but failing his basic duty to society is a prime example of grave dereliction.
- **Diagrams & Presentation:** A numbered list detailing specific forms of "grave dereliction" (e.g., harm to others, harm to environment, failing duty to national unity).

Question 5(b)

- **The Exact Question:** Justice without force is futile, force without justice is tyrannical.
- **Examples Used:** Hobbes ("Covenants without sword are nothing but words"); Max Weber (state monopoly over violence); Dharmashastras (graded punishment); JS Mill (slavery); Hitler/Holocaust; Taliban; US force in Iraq.
- **Context of the Example:** Hitler, the Taliban, and the US invasion of Iraq are all used as historical/contemporary international examples of "force without justice" (Tyranny). The Dharmashastras are cited as an example of historical structural injustice.
- **Diagrams & Presentation:** Clear division into a paragraph analyzing the first half of the quote, followed by a numbered list under the underlined heading "Tyrannical" analyzing the second half.

Question 6(a)

- **The Exact Question:** Success may not lead to happiness, but happiness is definitely the key to success. Discuss...
- **Examples Used:** OPHI data (India uplifting 270m out of poverty); Elizabeth Holmes (Theranos kit failure).
- **Context of the Example:** Elizabeth Holmes is used as a perfect modern corporate example of "success" (amassing wealth and fame) achieved without integrity, which ultimately did not lead to happiness or lasting success.
- **Diagrams & Presentation:** Simple numbered points.

Question 6(b)

- **The Exact Question:** "To delight in war is a merit in the soldier, a dangerous quality in the captain, and a positive crime in the statesman." - George Santayana. Can war be ethically justified?
- **Examples Used:** War in Ukraine; Hitler's Lebensraum (WW2); War on Terror; Arab war / 6 day war (Israel); Mau Mau Rebellion (Kenya) / Algerian war; Norman Angell quote.
- **Context of the Example:** Ukraine introduces the contemporary relevance. WW2, the War on Terror, and Israel are used to discuss the parameters of "Just War" theory

(justifying war for larger peace, human rights, or state survival). Mau Mau and Algeria are used to show ethically justified wars against colonial possession.

- **Diagrams & Presentation:** A branching bracket diagram under the heading "[Justifying the war]".

Question 6(c)

- **The Exact Question:** Education is the kindling of a flame, not the filling of a vessel... which five values should Indian education system inculcate...
- **Examples Used:** Margaret Mead quote; Swami Vivekananda quote; Kerala Curriculum special demonstration classes; Nelson Mandela quote.
- **Context of the Example:** The Kerala curriculum is cited as a practical administrative example of an education system moving away from rote learning (filling a vessel) toward teaching harmony and environmental protection (SDG goals).
- **Diagrams & Presentation:** Numbered list with underlined values (e.g., Harmony with our existence, Be the change...).

Case Studies

- **Strategy across cases:**
    - **External Mapping:** The candidate brilliant maps fictional case studies to real-world events. She maps the tennis player case to the **Novak Djokovic** Australian Open deportation. She maps the illegal wetland tower demolition case to the **Supertech Twin Towers** demolition in Noida and the **Maradu demolition** in Kerala.
    - **Stakeholder Maps:** Continues the topper trend of drawing explicit stakeholder web diagrams for every case.
    - **Dilemma Presentation:** Lists ethical dilemmas strictly using a "V/s" format (e.g., Protection of wetlands V/s Expansion of housing projects).
    - **Tabular Evaluation:** For evaluating options, she uses large T-tables comparing "Merit" vs "Demerit" or "Course of action" vs "Justification".
    - **Corporate Examples:** In the sweatshop case study, she cites Bill Gates and Narayan Murthy as real-world examples of "Ethical Capitalists" to argue that the NGO head must prioritize labor rights over company finances.

Document 22: Pavan Datta - Essay

- **The Exact Question:** "Our deeds determine us as much as we determine our deeds."
- **Examples Used:** Steve Smith (Sandpaper gate); Adolf Hitler vs Nelson Mandela; King Dasharatha; India's anti-terrorism stance (ICJ); 1991 Kandahar hijack (IC-814 - note: historical event was 1999, but candidate wrote 1991).
- **Context of the Example:** Steve Smith is used as a powerful, non-traditional opening hook. Despite his hard work and #1 ranking, one bad deed (cheating/Sandpaper gate) redefined his entire identity ("named as a cheat"), proving that a deed

determined the man. Hitler vs Mandela contrasts how different people respond to similar hardships. The Kandahar hijack is used to show a complex moral dilemma where a nation's strict anti-terror stance was compromised to save civilian lives, showing how extreme circumstances can sometimes force our deeds.

- **Diagrams & Presentation:** Pure paragraph format. Uses capitalized sentences for emphasis (e.g., "OUR DEEDS DETERMINE US AS MUCH AS WE DETERMINE OUR DEEDS").

Document 23: Preksha Agrawal - Ethics

(Note: The provided excerpt for Preksha Agrawal contained only the printed Hindi translation of the Bhuvan-ultra housing project case study. No handwritten answers were visible in the provided pages to extract strategies from).

Document 24: Rahul Srivastava - GS Paper 1

Question 14

- **The Exact Question:** How is general pattern of ocean surface current circulation related to global atmospheric circulation patterns?
- **Examples Used:** Labrador, North Atlantic, Gulf stream, California, North Equatorial, Humboldt, Brazil, Benguela, Agulhas, Oyashio, Kuroshio.
- **Context of the Example:** Maps specific global ocean currents to the wind patterns to physically demonstrate the theoretical cause-effect relationship.
- **Diagrams & Presentation:** Two highly effective hand-drawn diagrams. 1) A map of global ocean currents, uniquely using a circle "O" symbol to specifically denote warm currents and arrows for direction. 2) A cross-section of global atmospheric circulation showing Hadley and Ferrel cells with Doldrums and Westerlies clearly labeled.

Question 17

- **The Exact Question:** Account for the shift in location of sugar industry. What has been the economic and ecological consequences of these shifts?
- **Examples Used:** Punjab (soil degradation); 2G-bioethanol (E2025 target); Alfred Weber's theory of industrial location.
- **Context of the Example:** Uses Punjab to illustrate the negative environmental consequence of monoculture. Uses the E2025 blending target to show the positive economic transition to biofuel. Weber's theory is cited in the conclusion to provide geographic academic validation for the shift.
- **Diagrams & Presentation:** Clear subheadings for "NEGATIVES" and "POSITIVES" accompanied by numbered points.

Question 18

- **The Exact Question:** Population composition, rather than population size, is more critical determinant of development trajectory...

- **Examples Used:** India (Higher demog-dividend); China (Tapering in middle); Japan (Ageing population).
- **Context of the Example:** Uses the three specific Asian countries as real-world archetypes representing the three stages of demographic transition.
- **Diagrams & Presentation:** *Crucial presentation technique:* Draws three distinct population pyramid shapes side-by-side to visually prove the point without excessive text: A broad-base triangle (India), a kite shape (China), and an inverted urn/bulb shape (Japan).

Document 25: Rahul Srivastava - GS Paper 2

Question 6

- **The Exact Question:** Policy of reservation, started to provide equality of opportunities, has fallen victim to political opportunism. Critically examine the success of affirmative actions in the country.
- **Examples Used:** Dr BR Ambedkar's Constituent Assembly speech ("era of contradictions"); 270 million pulled out of poverty; Meenas in Rajasthan; OBC/EWS income limit case; Indra Sawhney and Nagaraj judgement.
- **Context of the Example:** Ambedkar provides the foundational constitutional argument for the policy. "Meenas in Rajasthan" are cited as a specific socio-political example of "imbalanced growth," where a certain section continuously corners the benefits. The Nagaraj judgement is cited regarding the legal limits of reservations in promotions.
- **Diagrams & Presentation:** Numbered lists. The candidate makes heavy use of boxes drawn around key concepts to draw the evaluator's eye (e.g., [era of contradictions], [trickle down], [methodology of evaluation], [equity]).

Document 26: Rahul Srivastava - Essay

- **The Exact Question:** (Context: Democracy, culture, and peace).
- **Examples Used:** Native Red Indians slavery -> Civil War -> modern civilisation; Jawaharlal Nehru's "Discovery of India"; Divya Devarajan, IAS in Adilabad District (Telangana); Mahatma Gandhi's oceanic circle; Rabindra Nath Tagore ("Where the mind is without fear").
- **Context of the Example:** Divya Devarajan IAS is used as a highly specific, brilliant administrative case study of a civil servant who learned the local Gondi language in 3 months to resolve tribal conflicts and establish peace through cultural respect. Tagore and Nehru are used to provide historical and philosophical grounding to the essay.
- **Diagrams & Presentation:** Pure essay format. Underlines key phrases, book titles, and important names.

Document 27: Umaharathi N - Anthropology (Optional Strategy Applied to GS/Security)

Question (c)

- **The Exact Question:** How Left wing extremism has affected India's internal security? Discuss the reasons for its emergence.
- **Examples Used:** LP Vidyarthi's tribal regionalisation; MHA's 'Red corridor'; Attacks on CRPF in Sukma district; LP Vidyarthi's study of Hatia industrial complex on Hos (90% land acquired was tribal); Konda Reddi tribe of AP (pushed out by protected forest tag); Naxalbari (West Bengal); Charu Majumdar; Abhay Xaxa committee (health deficit).
- **Context of the Example:** *Unique Strategy:* The candidate heavily uses Anthropological scholars and studies (LP Vidyarthi, NK Bose, Abhay Xaxa) to answer a standard internal security question, giving it a unique optional-specific depth. The Hatia industrial complex study provides hard, quantified data (90% land loss) to prove the "land alienation" cause. Sukma is cited for contemporary violence context.
- **Diagrams & Presentation:** Draws a map of India shading the "LWE areas" (Bastar, Adilabad, Srikakulam). Uses boxed subheadings and tree diagrams (e.g., branching the Abhay Xaxa committee findings into three prongs: IMR, shortage of health centers, and doctor deficits).

Document 28: Umaharathi N - Ethics

Case Studies

- **Strategy across cases:**
    - **Direct Philosophical Quotes in Conclusion:** Uses Bertrand Russell ("Coexistence or no existence") and the ancient Indian ethic "Vruksho rakshati rakshita" to conclude a case study on demolishing illegal towers on wetlands, providing a philosophical justification for environmental justice.
    - **Structuring Dilemmas:** Explicitly lists "Ethical dilemmas" using a "V/s" format (e.g., Protection of wetlands V/s Expansion of housing projects; Social welfare V/s Environmental Justice).
    - **Extensive Tabular Evaluation:** Uses massive 3-part T-tables spanning multiple pages to compare the "Pros" and "Cons" of different administrative options (e.g., Ex-post facto clearance vs Seize and seal vs Allow occupation with compensation).
    - **Corporate Examples:** In the sweatshop case study, she quotes Gandhiji ("Commerce without morality is a sin") and cites Bill Gates and Narayan Murthy as real-world examples of "Stakeholder Capitalism," arguing that the NGO head must act ethically even if it causes short-term financial difficulty.
    - **Saam-Dandh Approach:** Proposes phased action plans utilizing traditional Indian strategic thought (e.g., advising a "Saam" or persuasion approach first, followed by "Dandh" or punishment if the sweatshop contractor refuses to comply).

Document 29: Waseem Ahmad Bhat - Ethics (Continued)

Question 1

- **The Exact Question:** Successful people are not those who did not fail, but those who persisted... examine the importance of adversity quotient in life.
- **Examples Used:** Elon Musk's SpaceX; Gandhiji in Africa; APJ Abdul Kalam.
- **Context of the Example:** The examples are chosen to cover multiple dimensions: Musk represents persistence in business/technology; Gandhi represents persistence in political/moral struggles; Kalam represents persistence in academic and professional life despite early failures.
- **Diagrams & Presentation:** A central box labeled "Examples that depict this truth" branching out into three specific case-boxes containing the mini-stories for Musk, Gandhi, and Kalam.

Question (Strength)

- **The Exact Question:** "Strength does not come from physical capacity but from an indomitable will."
- **Examples Used:** Internalisation of patriarchy; Ho Chi Minh vs Americans; Gandhi.
- **Context of the Example:** Patriarchy is used creatively to show that societal enemies are often mental constructs, requiring mental toughness and will rather than physical force. Ho Chi Minh is used as a nuanced counter-example to show that physical force is sometimes required when facing adversaries who do not respect non-violence.
- **Diagrams & Presentation:** Numbered lists with underlined key phrases.

Case Study: Task Force Motivation

- **The Exact Question:** (Context: Motivating a task force against political pressure and mafia).
- **Examples Used:** Procedural administrative steps (Divisional Commissioner, CM).
- **Context of the Example:** Advises contacting the Divisional Commissioner or CM to bypass local political pressure. Uses Emotional Intelligence strategies to argue that the mafia's threats are vacuous to build team morale.
- **Diagrams & Presentation:** Numbered points with sub-bullets indicated by curved "↳" arrows.

Document 30: Anoushka Sharma - GS Paper 3 (Copy 1 Excerpts)

Question 2

- **The Exact Question:** Imported inflation is compounding the challenges of post-pandemic recovery for the Indian economy. Discuss.

- **Examples Used:** Russia-Ukraine war; Russian diamond exports; Wheat stock exports declining.
- **Context of the Example:** The candidate uses specific global events to define "Imported Inflation." The Russia-Ukraine war establishes the crude oil price shock. The specific mention of Russian diamond exports provides a unique, niche data point showing how specific Indian processing industries are suffering from foreign supply crunches.
- **Diagrams & Presentation:** Uses boxed subheadings explicitly addressing the two parts of the prompt: [* Imported Inflation] and [* Impact Post-Pandemic Recovery].

Question 8

- **The Exact Question:** Managing risks, rather than impacts, lies at the core of effective disaster management strategy. In light of this statement, describe the flood risk profile of India...
- **Examples Used:** Kerala floods; Ganga and Brahmaputra rivers; IFLOWS Mumbai; 2006 Mumbai floods (water clogging).
- **Context of the Example:** Kerala is used as an introductory hook to establish the contemporary relevance of floods. IFLOWS Mumbai is cited as a specific administrative and technological solution for "managing risks" via early warning, rather than just reacting post-disaster.
- **Diagrams & Presentation:** Draws a highly specific map of India titled "* Risk Profile". Crucially, she annotates specific disaster triggers directly onto the regions: "Glacial lake outburst" in the North, "Retreating monsoon + cyclones" on the Eastern coast, and "Sea level rise" on the Western coast.

Question 10

- **The Exact Question:** Examine how advancements in technology has allowed organize crime syndicates to not only expand but also diversify their activities.
- **Examples Used:** Cognitive hacking; Cryptocurrency; Dark web.
- **Context of the Example:** Moves beyond generic internet crime to name specific, sophisticated methods (cognitive hacking via polarized content) to show exactly how syndicates are "diversifying" their psychological and financial operations.
- **Diagrams & Presentation:** Highly structured numbered list under a boxed heading "[* Activities]", keeping the answer crisp and avoiding paragraph fatigue.

Question 16

- **The Exact Question:** Nanotechnology is an inter-disciplinary and inter-connected science that has revolutionary applications across sectors... discuss relevance for socio-economic development...
- **Examples Used:** Dr. Taniguchi (1980s); 1 to 100 nanometers scale; Carbon nanotubes; World's first nano fertiliser of urea (India).
- **Context of the Example:** The introduction is deeply factual, citing Dr. Taniguchi and the exact size scale to prove technical competence. Carbon nanotubes are used to

show specific medical applications (replacing ruptured blood vessels), and the Indian nano urea is cited as a direct agricultural/economic triumph.

- **Diagrams & Presentation:** Uses a distinct indented "↳" bullet structure to visually separate the core argument from its supporting scientific example.

Document 31: Anoushka Sharma - Ethics (Copy 5 Excerpts)

Question 6(a)

- **The Exact Question:** Ethics in international relations is a myth, only national interest determines the foreign policy. How far do you agree...
- **Examples Used:** Humanitarian Aid to Syria and Yemen; UNHRC action on Russia-Ukraine war; Indian aid to Sri Lanka; ODA (Official Development Assistance) to LDCs.
- **Context of the Example:** The candidate argues that ethics is *not* a myth by providing a rapid-fire list of contemporary geopolitical events where nations acted on moral grounds (e.g., India aiding Sri Lanka despite domestic economic pressures, showing compassion over pure realism).
- **Diagrams & Presentation:** Explicitly boxes the heading "[* Not a Myth]" and uses circled numbers combined with right-facing arrows ("↳") to neatly organize the counter-arguments.

Case Study: Samuel the Tennis Player

- **The Exact Question:** (Context: Famous tennis player refuses vaccination, lies in his affidavit, is deported).
- **Examples Used:** Wimbledon; Vaccine hesitancy.
- **Context of the Example:** The candidate directly maps this fictional case to real-world instances ("This was seen by various sportspersons refusing to get vaccinated during Wimbledon"), demonstrating awareness that ethical case studies often mirror recent current affairs (specifically the Novak Djokovic controversy).
- **Diagrams & Presentation:** Standard numbered format, underlined keywords ("Vaccine Hesitancy", "Violation of Rules").

Case Study: Evacuation

- **The Exact Question:** (Context: Evacuation of citizens during a war, prioritizing limited resources).
- **Examples Used:** Nil (Purely analytical approach based on the text provided).
- **Context of the Example:** N/A
- **Diagrams & Presentation:** Draws a central "Stakeholders" bubble map branching out to: IFS officer, staff, family, tourists, students, film crew, and neighbouring country people. This visually proves to the examiner that no marginalized group was ignored in the analysis. Ethical issues are explicitly structured as "X versus Y" (e.g., Personal welfare versus public welfare).

Case Study: Amit and Lithium Mining

- **The Exact Question:** (Context: Lithium mining displacing tribals and a deity's shrine in Central India).
- **Examples Used:** Article 21 (Right to dignified life); Naxalism.
- **Context of the Example:** Uses Article 21 to elevate the tribal displacement issue from a mere administrative hurdle to a fundamental constitutional violation. Naxalism is cited as the specific long-term "Security challenge" that arises from forced displacement.
- **Diagrams & Presentation:** A "Stakeholders" bubble map centrally locating Amit, branching out to government, tribals, flora & fauna, nation, and the world.

Document 32: Anoushka Sharma - Essay (Copy 8 Excerpts)

- **The Exact Question:** "Those who wish to reap blessings of liberty must undergo fatigue of supporting it."
- **Examples Used:** Edward Snowden (CIA surveillance); Mahatma Gandhi (National movement in SA); Dadabhai Naoroji (Economic drain); Roe vs Wade; George Floyd protests; Trump protests at Capitol; WTO agri-food subsidies.
- **Context of the Example:** The essay utilizes a multidimensional framework. Snowden represents the *individual* fatigue of supporting privacy. Gandhi and Naoroji represent the *historical/national* fatigue. Roe vs Wade represents the *gender/women's* struggle for bodily liberty. George Floyd represents the *social/racial* struggle. WTO subsidies represent the *international/economic* struggle of developing nations against developed ones.
- **Diagrams & Presentation:** The provided excerpt reveals her *brainstorming page*. It shows a highly organized mind-map where she breaks the essay into distinct dimensions (Historically, Women, George Floyd, India, Int. Stage), ensuring a structured, wide-ranging essay.

Document 33: Gunjita Agrawal - GS Paper 2 (Copy 1 Excerpts)

Question (Tensions in Federalism)

- **The Exact Question:** (Context: Reasons for tensions between Centre and States).
- **Examples Used:** Berubari Union case; GST compensation; Tamil Nadu using 'Union' against 'Centre'; J&K reorganisation; Citizenship Act protests in North-East.
- **Context of the Example:** Uses GST compensation to show economic/fiscal federalism friction. Tamil Nadu's linguistic/documentary defiance is used to highlight the threat to regional identity. J&K is cited to show unilateral political reorganisation causing mistrust.
- **Diagrams & Presentation:** Boxed heading "[REASON FOR TENSIONS]". Key phrases like "Against basic structure" and "unilateral" are heavily underlined.

Question (Concurrent List)

- **The Exact Question:** (Context: Examining the utility of the concurrent list).

- **Examples Used:** COVID-19 National lockdown; GST Council; Ramsar Convention; National Education Policy (NEP) 2020; Article 44 (UCC).
- **Context of the Example:** COVID-19 proves the list's utility in national crises. The GST council proves its utility in fostering "cooperative federalism." The NEP and UCC are cited as examples where the concurrent list helps create necessary "uniformity in social reforms" across a diverse nation.
- **Diagrams & Presentation:** A boxed heading "[UTILITY]" followed by alphabetized points (a, b, c, d). Embedded examples are preceded by a clearly styled "Eg." tag.

Document 34: Gunjita Agrawal - Ethics (Copy 4 Excerpts)

Question (Ways to promote ethics)

- **The Exact Question:** (Context: Ethical governance and ways to promote it).
- **Examples Used:** Abortion law abolition in USA; Nolan Rules of integrity; Citizen Charters; "Compassionate Kozhikode" initiative; Kant's categorical imperative.
- **Context of the Example:** The US abortion ban is cited as a negative example where religious consciousness overtakes moral consciousness. "Compassionate Kozhikode" is a brilliant, specific administrative case study used to illustrate collaborative, empathetic governance at the district level.
- **Diagrams & Presentation:** Explicitly boxed heading "[WAYS AND MEANS TO PROMOTE]".

Question (Compassionate Capitalism)

- **The Exact Question:** (Context: Role of ethics in utilizing funds / corporate social responsibility).
- **Examples Used:** Vaccines by Serum Institute during COVID-19; Indian Railways net-zero by 2030 pledge; Birla Temples; Sonu Sood foundation; Thalis (meals to poor).
- **Context of the Example:** Serum Institute represents the "Utilitarian" ideal of maximum social advantage. Indian Railways represents tackling unprecedented issues (climate change). Sonu Sood represents effective collaboration.
- **Diagrams & Presentation:** *Excellent flowcharting:* She draws a bifurcating diagram from a central box "[Collaboration]", splitting into "[Effectiveness]" (Sonu Sood) and "[Efficiency]" (Meals through Thalis), visually breaking down the administrative impact of compassionate capitalism.

Question 6(a)

- **The Exact Question:** Ethics in international relations is a myth, only national interest determines the foreign policy.
- **Examples Used:** Chanakya; USA bombing Japan; Russia-Ukraine war; Majority in China lynching minority Uighurs.
- **Context of the Example:** Chanakya provides ancient Indian philosophical backing for realism. The Russia-Ukraine war perfectly illustrates the "Realist school" (power

dynamics). China's treatment of Uighurs is used to critique the "Consequentialist school," showing how maximizing advantage for the majority can lead to horrific unethical outcomes for minorities.

- **Diagrams & Presentation:** Uses a block diagram stacking "NATIONAL", "INTERESTS", "DETERMINE" next to her numbered points analyzing the different philosophical schools.

Case Study: Corruption in Housing

- **The Exact Question:** (Context: Mayank discovers SDM is involved in corruption regarding housing allotments).
- **Examples Used:** Commonwealth Games scam (2010); Indian Red Cross Society scam (2016); Adarsh Housing scam.
- **Context of the Example:** She immediately anchors the fictional case study to massive real-world institutional failures (Adarsh housing being the most direct parallel to the case study's theme). This proves to the evaluator her deep knowledge of administrative history.
- **Diagrams & Presentation:** Uses a boxed "WHY COMMON" heading to transition into the root causes.

Case Study: Bhuvan-Ultra / Apps / Mining

- **The Exact Question:** (Various fragmented case studies regarding App privacy, Mining dilemmas).
- **Examples Used:** SC's Puttaswamy case (Right to Privacy); Russia-Ukraine war's impact on semiconductors.
- **Context of the Example:** Puttaswamy is cited to provide strict constitutional backing against mandatory app downloads. The Russia-Ukraine war is cited in the lithium mining case to establish the macro-economic urgency (energy self-sufficiency) driving the mining project, validating the immense pressure the officer faces.
- **Diagrams & Presentation:**
    - *Dilemma Mapping:* Strictly uses an "X vs Y" format for every dilemma (e.g., "Privacy vs Openness", "Duty vs conscience").
    - *Dimension Mapping:* Breaks down the case implications into categorical arrows: "ECONOMY:", "SOCIETY:", "NATION:", "POLITY:".
    - *Evaluation Tables:* Uses highly structured "Merits" vs "Demerits" bracket diagrams to evaluate options.

Document 35: Gunjita Agrawal - Essay (Copy 7 Excerpts)

- **The Exact Question:** (Context: Dignity of Human Life and Social Media paradoxes).
- **Examples Used:** Immanuel Kant; Mahabharata (Cheerharan of Draupadi); HIV AIDS; Transgenders; Nazi Germany / Holocaust; Ashoka's Dhamma; Sabarimala; Nirbhaya; Metoo; Gangubai (Cinema); Mark Zuckerberg.
- **Context of the Example:**

    - For *Dignity*: Kant provides the philosophical bedrock. Draupadi provides the mythological context of violating dignity for political/patriarchal tools. The Holocaust provides the extreme international context. Sabarimala and Metoo represent modern conflicts over dignity.
    - For *Social Media*: Zuckerberg's quote ("connectivity is a basic human right") is used to introduce the utopian promise of social media before she breaks down its paradoxes.
- **Diagrams & Presentation:** The rough work reveals a stunningly detailed brainstorming tree. She maps "The United In Respect" branching to "Traditional" (Ashoka, Akbar), "Freedom Struggle" (Self-reliance), and "Contemporary" (Rise of SC/ST Presidents). She also maps "Conflict" branching to Sabarimala, Regionalism, and Climate change. This structured pre-writing ensures a highly organized final essay.

Document 36: Ishita Kishore - GS Paper 1 (Copies 1 & 4 Excerpts)

Question (Imperialism & Globalization)

- **The Exact Question:** (Context: Modern imperialism and social impacts of globalization).
- **Examples Used:** Debt trap diplomacy of Belt & Road Initiative; France's secularism (Hijab ban); EY India employment; Apple Co. economy size.
- **Context of the Example:** BRI defines modern "economic" imperialism. France's Hijab ban illustrates the "social identity crisis" sparked by globalization. Apple's size illustrates "political" power shifting from nations to Big Tech.
- **Diagrams & Presentation:** Organized by Roman numerals representing dimensions (II. Social, III. Political) followed by numbered points with "Eg:" callouts.

Question (Oceanic Temperature)

- **The Exact Question:** (Context: Effects of variation in oceanic temperature).
- **Examples Used:** Jellyfish; Mariana trench; Samudrayaan Mission of India.
- **Context of the Example:** Jellyfish show biological vulnerability to heat. Mariana trench shows the geological research value of cold deep waters. Samudrayaan shows how temperature variations dictate the specific engineering/technology required for deep-sea exploration.
- **Diagrams & Presentation:** Clean numbered list.

Question 19

- **The Exact Question:** Assess India's vulnerability to water related disasters. How can better management... make the country more resilient...
- **Examples Used:** Brahmaputra (Kamrup district); Kosi (Sorrow of Bihar); Damodar; Mullaperiyar Dam; Cyclones Tithli and Fani; GLOF in Joshimath; Ice Stupas in Ladakh.

- **Context of the Example:** Specifically categorizes vulnerabilities geographically. Rivers (Kosi, Brahmaputra) cause shifting-course floods. Coastlines face cyclones (Tithli, Fani) and sea-level rise. The Himalayas face GLOFs (Joshimath). "Ice Stupas" are cited as a highly innovative, localized management solution for water conservation in frozen deserts.
- **Diagrams & Presentation:** Uses underlined headings for geographic zones ("I. Rivers", "II. Coastline", "III. Himalayan"). Includes a "Better Management" bubble diagram linking to IMD, Early Warning Systems, and Disaster Resilient Infrastructure.

Question 1

- **The Exact Question:** Gandhian ideology secured democracy in the country even before it was formally established. Comment.
- **Examples Used:** Tolstoy Farm; JB Kripalani, Sarojini Naidu; Harijans.
- **Context of the Example:** Tolstoy Farm is used to practically demonstrate the ideology of "Self-sufficiency" and dignity of labor (scavenging/cleaning). Mentioning leaders like Kripalani and Naidu proves the ideology successfully unified diverse social strata (lawyers, women, students).
- **Diagrams & Presentation:** Uses a branching bracket off "Tolstoy Farm" pointing to "work, skills, scavenging, handicraft."

Question 6

- **The Exact Question:** Describe the main pillars of India's Arctic Policy. Why is arctic region gaining greater geopolitical significance...
- **Examples Used:** Vasudeva Kutumbakam; Vladivostok (Far East investments); Research stations (Himadri, Bharti).
- **Context of the Example:** Vasudeva Kutumbakam anchors the policy in traditional Indian diplomatic philosophy. Himadri and Bharti are the hard, factual proofs of India's scientific presence in the region.
- **Diagrams & Presentation:** Uses a boxed heading "[Pillars of Arctic policy]" and numbers the 5 main pillars cleanly.

Question 14

- **The Exact Question:** How is general pattern of ocean surface current circulation related to global atmospheric circulation patterns?
- **Examples Used:** AMOC; Fishing grounds near Japan; Kalbaisakhi; Onam.
- **Context of the Example:** Explains the impact of these currents. Japan is cited for biodiversity (mixing of hot/cold currents). Kalbaisakhi and Onam are brilliantly used to show how ocean-driven rainfall patterns directly dictate human cultural/economic festivals in India.
- **Diagrams & Presentation:** Draws a spherical diagram of the Earth marking the Polar cell (Polar easterlies), Ferrel cell (Westerlies), and Hadley cell (Trade Winds) with directional arrows to visually explain wind circulation.

Question 18

- **The Exact Question:** Population composition, rather than population size, is more critical determinant of development trajectory...
- **Examples Used:** 60% of India in 15-59 yrs; Vayoshri Yojna; Amartya Sen's Capability Approach.
- **Context of the Example:** 60% working age proves India's demographic dividend potential. Vayoshri Yojna highlights the specific fiscal burden of an aging demographic. Sen's approach argues that population size is only a burden if the state fails to provide health and security.
- **Diagrams & Presentation:** Draws two Population Pyramids to contrast India (broad base, young) and Japan (inverted triangle, aging).

Document 37: Ishita Kishore - GS Papers 2 & 3 (Copies 2, 3, 5 Excerpts)

Question (Centre-State Relations)

- **The Exact Question:** (Context: Constitutional provisions integrating diversity and causing tensions).
- **Examples Used:** Article 371; Schedule V and VI; Governor office.
- **Context of the Example:** Schedules V and VI are cited as the constitutional mechanisms providing unique autonomy to tribals, integrating them without forced uniformity. The Governor's office is cited as the primary modern friction point.
- **Diagrams & Presentation:** Roman numeral bullet points.

Question 2 (Imported Inflation)

- **The Exact Question:** Imported inflation is compounding the challenges of post-pandemic recovery for the Indian economy. Discuss.
- **Examples Used:** Ukraine War; Pharmaceutical dependence on APIs from China; Windfall Gains Tax.
- **Context of the Example:** The Ukraine war is the primary geopolitical trigger. Chinese APIs show supply-side vulnerability. The "Windfall Gains Tax" is cited as a very specific, recent domestic policy response by the government to capture excessive profits from fuel exporters.
- **Diagrams & Presentation:** A flow-diagram originating from "[Causes]", branching left to "Geopolitical crisis (Ukraine War)" and right to "Supply chain disruptions -> Lockdowns across the world."

Question 5

- **The Exact Question:** Space based technologies are helpful in not only monitoring development, but also enhancing it.
- **Examples Used:** GAGAN satellite; Smog over Delhi; GLOF in Uttarakhand; Mission Shakti ASAT; Elon Musk internet; NSIL.
- **Context of the Example:** GAGAN is used for aviation accuracy. Delhi Smog and Uttarakhand GLOFs are monitored via satellite. ASAT is used to show enhancement

of geopolitical strength. NSIL is mentioned in the conclusion to highlight the new push for private participation.

- **Diagrams & Presentation:** Separates the answer cleanly into "Role in monitoring development" and "Role in enhancing development".

Question 8

- **The Exact Question:** Managing risks, rather than impacts, lies at the core of effective disaster management strategy.
- **Examples Used:** India ranks 7th on Climate Risk Index; Kosi river (Natural); Mumbai, Hyderabad, Chennai (Urban); Kerala (lack of preparedness).
- **Context of the Example:** The Climate Risk Index sets a factual, urgent tone. specific cities are cited to differentiate "Natural flooding" from "Urban floods."
- **Diagrams & Presentation:**
    - Draws a map of India pointing out the geographical locations of different flood types.
    - Draws a cyclic flow chart for the "Sendai Framework" (Mitigation -> Preparation -> Execution -> Response & Relief).

Question 10

- **The Exact Question:** Examine how advancements in technology has allowed organize crime syndicates to not only expand but also diversify...
- **Examples Used:** Clubhouse used by terrorists; WhatsApp encryption; Low intensity nuclear weapons; Golden Crescent & Golden Triangle; Punjab drone weapons.
- **Context of the Example:** Mentions specific platforms (Clubhouse, WhatsApp) to show modern radicalization and communication blocking. Mentions drone drops in Punjab to show the immediate, physical cross-border security threat.
- **Diagrams & Presentation:** A bubble diagram titled "Diversification of terrorists" linking to Cyber war, Privacy of citizens, Bio war, and Coordinated attack.

Question 11

- **The Exact Question:** Achievement of a 400 billion USD merchandise export is a result of concerted and collective efforts towards an Atmanirbhar Bharat...
- **Examples Used:** MSME package; MITRA scheme for textiles; Turant Customs scheme; PLI for food processing; Vadhawan Port (Maharashtra).
- **Context of the Example:** MITRA and PLI represent the manufacturing push. Turant Customs represents the digitization/ease of doing business push. Vadhawan Port is cited as a specific infrastructure project needed to handle the massive cargo increase.
- **Diagrams & Presentation:** Standard underlined headings and "Eg >" bullet points.

Question (Internal Security/Police)

- **The Exact Question:** Emerging internal security threats of the 21st century call for a modern, efficient and responsive police force...

- **Examples Used:** NSCN (Nagaland); LWE (Naxals); Kerala youth recruited by ISIS; COBRA.
- **Context of the Example:** NSCN and LWE represent unbalanced development/separatist threats. ISIS recruitment in Kerala represents invisible, cyber-driven radicalization. COBRA is cited as the specific specialized force needed for modern guerilla warfare.
- **Diagrams & Presentation:** A top-down tree diagram breaking "Emerging internal security threats" into three branches: Psychological (Separatist), Unbalanced development (Naxals), and Cyber/Radicalisation (ISIS).

Question 19

- **The Exact Question:** How are 'hybrid-militants' different from militants and Over Ground Workers (OGW)?
- **Examples Used:** Baramulla (called Mini Pakistan); Poonch.
- **Context of the Example:** Mentions Baramulla to illustrate the creation of specific "islands of hybrid militants" where radicalization is dense. Poonch is cited to geographically locate the trafficking circuits near the LoC enabling these militants.
- **Diagrams & Presentation:** Numbered points distinguishing the traits (e.g., Unrecognisable citizens, Indoctrinated but soft face, Invisible to agencies).

Document 38: Ishita Kishore - Ethics (Copy 7 Excerpts)

Question (Anonymity)

- **The Exact Question:** Civil servants should work for a cause and not for applause. Examine why bureaucratic anonymity is considered a foundational value...
- **Examples Used:** Sardar Patel ("Steel frame of India").
- **Context of the Example:** Used as the opening quote to define the historical, non-political intent behind the creation of the civil services.
- **Diagrams & Presentation:** Underlined subheadings.

Case Study: Samuel the Tennis Player

- **The Exact Question:** (Context: Famous tennis player refuses vaccination, lies in his affidavit, is deported).
- **Examples Used:** Aristotle ("Virtue & Vice are both in our power").
- **Context of the Example:** The Aristotle quote is used beautifully to argue that famous personalities with immense power to reach millions have a binding duty to showcase responsible behavior.
- **Diagrams & Presentation:**
    - A "Stakeholders" web diagram.
    - Explicit "V/s" formatting for dilemmas (e.g., "-i- Personal V/s Community needs").

Case Study: Evacuation

- **The Exact Question:** (Context: Prioritizing evacuation during a war).
- **Examples Used:** Categorization logic.
- **Context of the Example:** Establishes a "People-centric governance approach" prioritizing the most vulnerable.
- **Diagrams & Presentation:** Creates a literal indexed list for triage: "I. Dependent population -> Elderly above 60 -> category 1: parents, category 2: staff, category 3: tourists." This displays exceptional administrative organization to the evaluator.

Document 39: Kanika Goyal - Ethics (Copy 6 Excerpts)

Question 1(a)

- **The Exact Question:** "Ethics is not just a contemplative discipline..." Discuss how different schools of ethics help us...
- **Examples Used:** Socrates ('know thyself'); Kantian 'Categorical Imperative'; Google's HR policy ("Google for Googlers"); Climate justice.
- **Context of the Example:** "Google for Googlers" acts as a modern, corporate manifestation of the Kantian rule of treating people as ends, not means. Climate justice illustrates judging an act by the 'happiness' or survival it brings to all.
- **Diagrams & Presentation:** A bracket diagram separating "As a contemplative" into "thinking of Meta-Reality" and "thinking in abstraction".

Question 1(b)

- **The Exact Question:** While one group considers abortion as unmitigated evil, the other sees it as morally acceptable. Analyse...
- **Examples Used:** Roe V/s Wade; 'My body, My life, My choice'; Malta abortion ban; Medical Termination of Pregnancy Act 1971; Joseph Shine case; PCPNDT Act.
- **Context of the Example:** Malta is cited as the international theocratic counterpoint to individual autonomy. The Joseph Shine case is strategically cited as Indian legal precedent affirming a woman's bodily integrity.
- **Diagrams & Presentation:** A highly effective T-table directly comparing "For abortion (Pro-choice)" against "Against Abortion (Pro-life)".

Question 2(a)

- **The Exact Question:** What lessons can be learnt from the life of Mahatma Gandhi for promoting social harmony...
- **Examples Used:** Einstein quote; Fast at Red Fort; Article 17; Triple Talaq judgement; Noakhali riots; Jinnah's Two Nation Theory.
- **Context of the Example:** Noakhali represents establishing peace through direct conversation and breaking silos. The Triple Talaq judgement is used as a modern parallel to Gandhi's idea of internal social reform (eliminating orthodoxy within one's own group).

- **Diagrams & Presentation:** Uses boxed headings and underlines key phrases.

Question 2(b)

- **The Exact Question:** What is Kant's categorical imperative? How does it compare with the doctrine of Nishkama Karma?
- **Examples Used:** Krishna asking Arjuna to not stop and run away from war (Chapter 2, Shloka 39).
- **Context of the Example:** This specific textual reference to the Gita perfectly illustrates Nishkama Karma (doing one's immediate duty regardless of consequence), directly contrasting it with Kant's rigid, universal rules.
- **Diagrams & Presentation:** A bracket flow-diagram breaking down Kant's philosophy: "deontological -> Universally applicable -> Happiness for all".

Question 3(a)

- **The Exact Question:** Emotional intelligence (EI) not only helps in managing stress but also transforms distress into eustress. Elaborate.
- **Examples Used:** OP Chaudhary (DM Chhattisgarh - Nyay Jyoti); Gyanvapi case judgement; Elon Musk; Satish Dhawan and Dr. Kalam; Ashokan Dhamma; Serena Williams.
- **Context of the Example:** OP Chaudhary is a brilliant civil service example of using EI to manage conflict in Naxal areas. Serena Williams illustrates an individual shedding negativity to perform (distress to eustress). Dhawan and Kalam represent leaders building rapport to absorb team stress.
- **Diagrams & Presentation:** Clear numbered points with "eg." callouts.

Question 4(a)

- **The Exact Question:** Discuss the structure of attitude and explain the relationship between attitude and behaviour.
- **Examples Used:** Socrates/Vivekananda (Neo-Vedantism); Jalore Dalit boy killing; Shehzad & Saud (Delhi vets); Chinese aggression in Taiwan strait.
- **Context of the Example:** The Jalore tragedy illustrates the behavioral consequence of a prejudiced cognitive attitude. Shehzad & Saud (who self-taught themselves to save animals) illustrate the affective/emotional component driving compassionate behavior.
- **Diagrams & Presentation:**
    - A bracket diagram mapping the "CBA" (Cognitive, Behavioural, Affective) structure.
    - A T-table explicitly contrasting the definitions and examples of "Attitude" vs "Behaviour".

Question 4(b)

- **The Exact Question:** Greed is a bottomless pit... How can such negative desires be controlled?

- **Examples Used:** Edmund Burke quote; Machiavelli and Hobbes; PM at COP26 (Recycle-Reuse); Bhutan Gross National Happiness index.
- **Context of the Example:** Machiavelli and Hobbes provide the philosophical explanation for humanity's inherently greedy/capitalistic nature. Bhutan's index is provided as a systemic, governmental solution to shift society from consumerism to sustainable well-being.
- **Diagrams & Presentation:** Numbered points with underlining.

Question 5(a)

- **The Exact Question:** A man can give up a right, but he may not give up a duty without being guilty of a grave dereliction.
- **Examples Used:** Aristotle quote; Rabindranath Tagore quote.
- **Context of the Example:** The candidate argues that a terrorist surrenders his right to civilized treatment, but by fomenting violence, he completely fails his duty to society, representing a grave dereliction.
- **Diagrams & Presentation:** A clear numbered list identifying specific forms of "grave dereliction" (e.g., harm to others, harm to environment, failure of state).

Question 5(b)

- **The Exact Question:** Justice without force is futile, force without justice is tyrannical.
- **Examples Used:** Hobbes ("Covenants without sword"); Max Weber; Dharmashastras; JS Mill; Hitler; Taliban; US force in Iraq.
- **Context of the Example:** Hobbes and Weber establish the state's legitimate monopoly on force to ensure justice. The Dharmashastras are cited uniquely as "historical injustice" where force was used disproportionately against lower sections. Hitler, the Taliban, and the US in Iraq represent modern "force without justice" (Tyranny).
- **Diagrams & Presentation:** Clearly divided into paragraphs addressing the two halves of the quote.

Question 6

- **The Exact Question:** (Context: Success vs Happiness; Justifying War; Values in Education).
- **Examples Used:** Elizabeth Holmes (Theranos); Hitler's Lebensraum; Arab war / Israel; Mau Mau Rebellion; Norman Angell; Kerala Curriculum.
- **Context of the Example:** Elizabeth Holmes is the quintessential modern example of "success" (wealth/fame) achieved via corruption, leading to ruin rather than happiness. Mau Mau is used to show ethically justified wars against colonial possession. The Kerala Curriculum is cited as an administrative attempt to move away from rote learning.
- **Diagrams & Presentation:** Uses bracket diagrams and underlined key headings.

Case Studies (Dream Company, Kailash Eco-friendly, Dr Ashmita)

- **Strategies across cases:**

- **Tabular Evaluation:** Uses large T-tables to evaluate "Merit" vs "Demerit" or "Course of action" vs "Justification" (e.g., evaluating whether to decline a promotion or talk to the boss).
- **Specific Frameworks:** In the Kailash eco-products case, she categorizes behavioral nudges into "Social Influence" (demonstrative/visual impact), "Persuasion" (Shark Tank), and "Market apparatus" (Green bonds).
- **Legal/Ethical grounding:** In the Dr. Ashmita (hospital violence) case, she explicitly recommends laws modeled on the Epidemics Diseases Act (amended during COVID-19) and adherence to the Hippocratic oath.

Document 40: Pavan Datta - Essay (Copy 6 Excerpts)

- **The Exact Question:** "Our deeds determine us as much as we determine our deeds."
- **Examples Used:** Adolf Hitler; Nuclear Disarmament / India's 'No First Use' doctrine; NSG, UNSC.
- **Context of the Example:** Hitler is used as the historical negative example of deeds driven by hardship shaping a tyrannical identity. India's "No First Use" nuclear doctrine is used as a macro-political, international example. India determined this peaceful deed (policy), and in turn, this deed determined India's global identity as a "responsible country," earning support for NSG and UNSC membership.
- **Diagrams & Presentation:** Pure paragraph format. Capitalizes key thematic statements for emphasis. The focus is on weaving concepts like "Dharma" and "Karma" through the international examples.

Document 41: Preksha Agrawal - GS Paper 1 & Ethics (Copies 1, 7 Excerpts)

Question (Indian Democracy)

- **The Exact Question:** (Context: Shortcomings in Indian democracy).
- **Examples Used:** 73rd/74th Amendment Acts; Criminalisation in Parliament (43% in 2019); "Sarpanch Pati".
- **Context of the Example:** The 73rd/74th amendments represent structural successes. The 43% data point provides hard empirical proof of criminalization. "Sarpanch Pati" is a highly specific, grounded administrative example showing the failure of gender representation at the lowest rung.
- **Diagrams & Presentation:** Uses a mini-table to show the jump in criminalization (2014-19: 30% -> 2019-now: 43%).

Case Study: Bhuvan-Ultra

- **The Exact Question:** (Context: Demolition of illegal residential towers on a wetland).
- **Examples Used:** Article 21 (Right to life); Uttarakhand High Court ruling on Ganga/Yamuna.

- **Context of the Example:** Cites the Uttarakhand HC ruling (granting legal entity status to rivers) to elevate the status of the wetland, balancing it legally against the citizens' Article 21 rights.
- **Diagrams & Presentation:** Utilizes a highly structured table with three columns: "Perception Index / Options", "Merits", and "Demerits" to rapidly evaluate alternatives to demolition.

Case Study: Universal Sisterhood of Dreams (Sweatshops)

- **The Exact Question:** (Context: NGO head uses profits from a clothing brand utilizing sweatshops in a developing country).
- **Examples Used:** Gandhiji ("Commerce without morality is a sin"); Bill Gates, Narayan Murthy ("Stakeholder Capitalism").
- **Context of the Example:** Quotes Gandhi to firmly establish that legality does not equal morality. Cites Gates and Murthy as real-world corporate role models to argue that the NGO head must accept short-term financial hits to protect labor rights.
- **Diagrams & Presentation:**
    - Explicitly defines dilemmas using "V/s" (e.g., "Protecting financial viability V/s Upholding ethical/moral command").
    - Proposes a phased action plan drawing on traditional Indian strategy: "The 'Saam' approach with 'Dandh' to bring change" (Persuade the contractor first, punish/cancel contract if they refuse).
    - Uses a large T-table: "Course of action" alongside "Justification".

Document 42: Umaharathi N - Ethics (Copy 6 Excerpts)

(Note: Based on the provided imagery, this excerpt covers the exact same Bhuvan-ultra case study with a distinct handwriting/presentation style).

Case Study: Bhuvan-Ultra

- **The Exact Question:** (Context: Demolition of illegal residential towers on a wetland).
- **Examples Used:** Bertrand Russell quote ("Coexistence or no existence"); Indian ethic "Vruksho rakshati rakshita".
- **Context of the Example:** These philosophical and traditional quotes are used in the conclusion to provide profound, ethical justification for protecting the environment alongside human development (Net zero loss).
- **Diagrams & Presentation:**
    - Lists "Ethical dilemmas" rigorously using a circled "V/s" format (e.g., Protection of wetlands V/s Expansion of housing projects).
    - Uses a massive, multi-page T-table to compare the "pros" and "cons" of specific administrative options (e.g., Ex-post facto clearance vs Seize and seal vs Allow occupation with compensation).

Document 43: Waseem Ahmad Bhat - GS & Ethics (Copies 1, 2 Excerpts)

Question (I2U2)

- **The Exact Question:** (Context: Importance of the I2U2 grouping for India).
- **Examples Used:** "De-hyphenated" policy; Micro-irrigation.
- **Context of the Example:** Uses the specific diplomatic term "de-hyphenated" to explain how India now manages Middle East relations. Cites Israel's "micro-irrigation" as the specific technological sphere of collaboration.
- **Diagrams & Presentation:** Numbered bullet points with circled numbers.

Question (Ethics/Action)

- **The Exact Question:** (Context: Inaction vs fighting for justice).
- **Examples Used:** Stalin; Nelson Mandela; Greta Thunberg; Medha Patkar; Immanuel Kant.
- **Context of the Example:** Stalin is used to show how silent spectators fueled dictatorships. Mandela is the archetype of fighting evil. Thunberg (climate injustice) and Patkar (majoritarianism/displacement) are used as modern examples of raising one's voice.
- **Diagrams & Presentation:** Bullet points culminating in a philosophical quote by Kant ("do what they ought to do") to anchor the conclusion.

Case Study: Illegal Mining Task Force

- **The Exact Question:** (Context: Recommending measures against a mining mafia).
- **Examples Used:** Venkatachaliah; Predictive policing.
- **Context of the Example:** Cites Venkatachaliah regarding the necessity of "certainty of punishment" to deter the mafia. Recommends "predictive policing" (using AI/Social media) as a modern law enforcement tactic.
- **Diagrams & Presentation:** Numbered points with "↳" sub-bullets.

Case Study: Abha DM (Dalit Sarpanch)

- **The Exact Question:** (Context: Dalit Sarpanch discriminated against by Panchayat secretary, forced to sit on the floor, not allowed to hoist flag).
- **Examples Used:** Nil (Only the question text is visible in the provided image).
- **Context of the Example:** N/A.
- **Diagrams & Presentation:** N/A.

Document 44: Kanika Goyal - GS Paper 3 (Addendum)

(Note: The provided excerpt contains the final question of a previously analyzed GS-3 paper).

Question 20

- **The Exact Question:** Commercialization of agriculture into agribusiness is necessary to uphold the spirit of farming as a profitable venture. Discuss in light of changes needed in agriculture marketing. Analyze the recent govt initiatives in supporting the transformation...
- **Examples Used:** SDG 2 (Zero Hunger); e-NAM expansion (from 1000 Mandis -> 65,000 APMCs); Agristalk Portal; PM-AASHA.
- **Context of the Example:** Uses SDG 2 to link agricultural profitability to the broader international goal of eliminating hunger (as profitable farmers produce more sustainably). Mentions the exact scaling target of e-NAM (1000 to 65,000) to provide hard administrative data proving the government's digital push.
- **Diagrams & Presentation:** Uses numbered points with underlined keywords. Employs a specific concluding formula, linking the empowerment of "Annadata" (food provider) to the "Atmanirbharta" (self-reliance) of the nation.

Document 45: Kanika Goyal - Ethics (Case Studies Detail)

Case Study: Samuel the Tennis Player

- **The Exact Question:** (Context: Samuel, a famous tennis player, refuses a COVID-19 vaccine mandate, lies on his affidavit to enter country A, and faces deportation and backlash).
- **Examples Used:** Novak Djokovic; Sushant Singh Rajput case; Indonesian YouTube influencers.
- **Context of the Example:** The candidate immediately demonstrates administrative awareness by writing: *"The case presented above is similar to the case when Novak Djokovic (Tennis player) was held from playing..."*. She cites "Indonesian YouTube influencers" getting vaccinated as a positive counter-example of influencers using their platform responsibly. She cites the "Sushant Singh" case to show the massive, real-world societal impact/discussions triggered by celebrity actions.
- **Diagrams & Presentation:**
    - Draws a "Stakeholders" web diagram centrally locating Samuel and linking to the World, Tournament organizers, Fans/Youth, and Country 'A'.
    - Uses bullet points with a specific "(•)" style to list ethical issues cleanly.

Case Study: Dream Company Promotion

- **The Exact Question:** (Context: You receive a promotion over two equal co-joiners. You suspect it is due to a shared caste 'surname' with the boss and pedigree of your college, leading to guilt regarding equal opportunity).
- **Examples Used:** Article 39 (Constitutional ethics of equal pay); Emotional Intelligence (EI).
- **Context of the Example:** Uses Article 39 to elevate the dilemma from a mere corporate HR issue to a fundamental violation of Indian constitutional values. Suggests using EI to conduct a "non-emotive analysis" before reacting to the boss.

- **Diagrams & Presentation:**
    - A structured "Stakeholders" bracket diagram mapping "Me", "Co-colleagues", "Boss", and "Other workers".
    - Uses a classic "Merit vs Demerit" T-table to evaluate two distinct options (Decline promotion vs Continue with promotion) before proposing a third, optimized "Course of action".

Case Study: Kailash Eco-friendly

- **The Exact Question:** (Context: Kailash creates eco-friendly biodegradable plastics but faces high costs, losing investors and customers. Needs to nudge people towards eco-friendly products).
- **Examples Used:** YouTube/Facebook; Shark Tank; Japanese leaf plate machinery in Himachal Pradesh; Sovereign Green Bonds; Bhutan Happiness Index / PM at COP26 (Zero-waste lifestyle).
- **Context of the Example:** Proposes highly practical, modern administrative solutions. Suggests using "Shark Tank" for mass-reach persuasion. Mentions a real-world initiative ("Japanese leaf plates in Himachal") as a successful example of government collaboration. Suggests "Green Bonds" to utilize corporate CSR funds to scale the business.
- **Diagrams & Presentation:**
    - Draws a bubble map linking "Plastics" to their specific environmental harms (Clogging rivers, Microplastics -> Thermal pollution/Fish kill, Bio-accumulate).
    - Structures the "Behavioral Change" section into specific categorized boxes: [Social Influence], [Visual Impact], and [Persuasion].

Case Study: Dr. Ashmita (Hospital Violence)

- **The Exact Question:** (Context: Dr. Ashmita faces violence from an MLA after a patient dies of unpredictable postpartum hemorrhage while the doctor was attending another emergency. She commits suicide due to police harassment).
- **Examples Used:** Epidemic Diseases Act 1889 (amended during COVID-19); Hippocratic Oath; John McCarthy (Blood bank).
- **Context of the Example:** Points out the systemic legal failure (absence of codified law to protect doctors), citing the temporary amendment to the Epidemics Act during COVID-19 as the exact legal framework needed permanently. Mentions ensuring "Blood bank" availability as a practical administrative step to prevent such unpredictable deaths in maternity clinics.
- **Diagrams & Presentation:** Explicitly boxes the core conflict: "[Moral ethical lapses]" and "[Administrative lapses]". Uses arrows to connect causes to effects (e.g., "Non recognition of bona-fide error -> they face violence").

Document 46: Pavan Datta - Essay

Essay 1

- **The Exact Question:** "One cannot change the world alone but can cast a stone across the water to create many ripples."
- **Examples Used:** Siddhartha (Buddha); Mahatma Gandhi (Salt March); Neil Armstrong; Jadav Payeng (Majuli Island); APJ Abdul Kalam (Wings of Fire); Abraham Lincoln; Dr. Verghese Kurien; B.R. Ambedkar; Sachin Tendulkar; Thomas Alva Edison; Satoshi Nakamoto (Bitcoin); Yuval Noah Harari (Sapiens); Adolf Hitler.
- **Context of the Example:** The essay utilizes a rapid-fire sequence of highly diverse examples to prove the premise across multiple domains.
    - *Spiritual/Historical*: Siddhartha renouncing his life was a single stone that created ripples of peace globally. Gandhi's Salt March was a small act that rippled into a massive independence movement.
    - *Environmental*: Jadav Payeng planting a single sapling rippled into the massive Majuli forest ecosystem.
    - *Technology/Economy*: Edison's repeated failures were stones leading to success. Nakamoto's whitepaper in 2008 was a stone that rippled into the massive modern cryptocurrency ecosystem.
    - *Counter-Perspective*: Hitler is used to show the dark side of the prompt—how a single bad actor can cast a stone that creates devastating, destructive ripples (Holocaust/WW2).
- **Diagrams & Presentation:** Pure essay format. The candidate uses excellent transitional quotes to introduce new paragraphs (e.g., quoting Gandhi: "First they ignore you, then they laugh at you, then they fight you, and then you win") and capitalizes key names to draw the evaluator's eye.

Essay 2

- **The Exact Question:** (Reconstructed from text context: True democracy requires respect for culture and people, and peace requires justice and development).
- **Examples Used:** Native Red Indians / American Civil War; Jawaharlal Nehru's "Discovery of India"; Divya Devarajan, IAS (Adilabad District); Mahatma Gandhi's 'oceanic circle'; Rabindranath Tagore ("Where the mind is without fear").
- **Context of the Example:**
    - *Administrative Context*: The use of Divya Devarajan, IAS is a brilliant, highly specific administrative case study. The candidate notes she learned the local Gondi language in 3 months, which respected the local culture and successfully established peace among tribals, proving the prompt's core thesis perfectly.
    - *Historical Context*: The American Civil War is cited to show that a "democracy" built on slavery and lack of cultural respect eventually collapses into war, requiring immense struggle to re-establish true peace.
- **Diagrams & Presentation:** Pure essay format. The rough work reveals a highly structured brainstorming method: the candidate explicitly mapped out a sequential chain ("Peace -> Justice -> Fairness -> Development -> Democracy") and jotted down specific thinkers (Amartya Sen, Tolstoy) for each node before writing.

Document 47: Preksha Agrawal - Ethics

Case Study: Bhuvan-Ultra

- **The Exact Question:** (Context: Bhuvan-ultra constructed two illegal residential towers on a wetland. The court ordered demolition. Evaluating alternatives to demolition).
- **Examples Used:** Article 21 (Right to life); Uttarakhand High Court ruling on Ganga and Yamuna.
- **Context of the Example:** The candidate balances human rights against environmental rights. Article 21 is used to represent the citizens' right to safe housing. The Uttarakhand HC ruling (which declared rivers as legal entities) is strategically used to argue that the wetland itself has inherent legal rights, justifying the strict protection of the environment.
- **Diagrams & Presentation:**
    - *Exceptional Structuring Technique:* The candidate uses a highly efficient, full-page, 3-column table to evaluate alternative actions. The columns are titled: **"Perception Index / Options"**, **"Merits"**, and **"Demerits"**.
    - This allows the candidate to rapidly break down options like "Find a suitable area for wetland development" or "Allocate that particular land as public area" without wasting words in long paragraphs.

Document 48: Umaharathi N - Anthropology (Applied to GS/Security)

(Note: This is a phenomenal example of using Optional subject knowledge to enrich a General Studies answer).

Question (c)

- **The Exact Question:** How Left wing extremism has affected India's internal security? Discuss the reasons for its emergence.
- **Examples Used:** L.P. Vidyarthi's tribal regionalisation; MHA's 'Red corridor'; Sukma district attacks; L.P. Vidyarthi's study of Hatia industrial complex on Hos; Konda Reddi tribe of AP; Naxalbari; Charu Majumdar; Abhay Xaxa committee; N.K. Bose.
- **Context of the Example:**
    - The candidate grounds the answer in hard Anthropological studies. L.P. Vidyarthi's study of the Hatia industrial complex provides empirical proof (90% of land acquired was tribal land with little compensation) to justify "land alienation" as a root cause of LWE.
    - The Konda Reddi tribe is used as a specific sociological example of communities pushed out by "protected forest tags".
    - The Abhay Xaxa committee data provides a quantified look at the "Governance deficit" (20% shortage in health centers, 50% deficit of doctors).

    - N.K. Bose is quoted in the conclusion to provide a nuanced perspective: LWE gave a voice to tribals, but it does not mean tribals inherently support Maoist ideology.
- **Diagrams & Presentation:**
    - Draws a specific, hand-sketched map of India identifying the "LWE areas" (Bastar, Adilabad, Srikakulam) overlaid with "Central & South Indian tribal areas" to visually prove the geographic overlap.
    - Uses a branching diagram to break down the Abhay Xaxa committee findings into three distinct points.

Document 49: Umaharathi N - Ethics

Case Study: Bhuvan-Ultra

- **The Exact Question:** (Context: Demolition of illegal residential towers on a wetland).
- **Examples Used:** NGT (National Green Tribunal) ruling; Bertrand Russell ("Coexistence or no existence"); Indian ethic ("Vruksho rakshati rakshita").
- **Context of the Example:** The NGT is cited to legally invalidate one of the options: stating that providing "Ex-post facto clearance is fraud on Environmental law". The philosophical quotes by Russell and ancient Indian ethics are used in the conclusion to justify why environmental justice cannot be sidelined for temporary socio-economic gains.
- **Diagrams & Presentation:**
    - Lists "Ethical dilemmas" rigorously using a circled "(v/s)" format (e.g., Protection of wetlands (v/s) Expansion of housing projects).
    - Uses a massive, multi-page T-table to compare the "Pros" and "Cons" of specific administrative options (e.g., Ex-post facto clearance vs Seize and seal vs Allow occupation with compensation).
    - Follows up with a final 2-column table explicitly matching "Course of action" to its "Justification".

Case Study: Universal Sisterhood of Dreams (USD)

- **The Exact Question:** (Context: NGO head uses profits from a clothing brand utilizing sweatshops in a developing country. Fire kills workers. Dilemma between maintaining funding vs upholding labor ethics).
- **Examples Used:** Kant's categorical imperative; The 'Saam' and 'Dandh' approach; Gandhiji ("Commerce without morality is a sin"); Bill Gates, Narayan Murthy.
- **Context of the Example:**
    - Kant is used to define the core dilemma: protecting financial viability vs upholding a moral command.
    - The candidate brilliantly applies traditional Indian statecraft ('Saam' - persuasion, and 'Dandh' - punishment) to structure the administrative response to the sweatshop contractor.

    - Gandhiji, Gates, and Murthy are cited as real-world corporate role models to argue that the NGO head must act as an "Ethical capitalist" and accept short-term financial hits to protect labor rights.
- **Diagrams & Presentation:**
    - Explicitly defines dilemmas using "V/s".
    - Relies heavily on a large, clean 2-column table ("Course of Action" | "Justification") to lay out the step-by-step solution.

Document 50: Pavan Datta - Essay

Essay 1 (New Topic)

- **The Exact Question:** Cyberspace - The fifth arena of warfare.
- **Examples Used:** Banning of Chinese Apps by India; Israel vs Iran cyber warfare; Russia meddling in USA elections; Web-War I in Estonia (2007) by Russia; Stuxnet virus (2009-10) against Iranian nuclear grids; Operation Ababil (Iran attacking USA banks); Vault-7 virus (CIA data breach); Talinn Manual; CERT-In; Kundankulam nuclear power project attack; Budapest Convention; Paris Call for Trust & Security (2018).
- **Context of the Example:** The candidate builds a chronological and geographical map of cyber warfare. *Estonia (2007)* is used to define the historical genesis of state-sponsored cyber attacks. *Stuxnet* is used to prove that cyberspace can cause direct, physical destruction of critical infrastructure (nuclear grids). *Kundankulam* is cited as a specific, terrifying instance of India's direct vulnerability to Chinese cyber probes. *Budapest Convention* and *Paris Call* are suggested as the required international diplomatic solutions.
- **Diagrams & Presentation:**
    - **Phenomenal Hook:** The essay does not start with a standard paragraph. Instead, it starts with an explicitly drawn box containing five distinct "Newspaper Headlines" (e.g., "INDIA BANS CHINESE APPS", "ALLEGED RUSSIA MEDDLES WITH RECENT USA ELECTIONS"). This immediately grabs the evaluator's attention.
    - **Map in Essay:** He draws a world map titled *"Fig: WEF - Global Risks Report"*, shading specific continents with horizontal lines to visually denote "High Risks of Cyber Attacks," bridging the gap between an essay and a technical GS answer.

Document 51: Preksha Agrawal - Ethics

Question 1(b) (Abortion)

- **The Exact Question:** While one group considers abortion as unmitigated evil, the other sees it as morally acceptable. Analyse various ethical concerns...
- **Examples Used:** Roe v/s Wade judgement; Savita Halappanavar (dentist died in Ireland in 2012); MTP Amendment 2021; Aristotle's 'Golden Mean'.
- **Context of the Example:** The citation of *Savita Halappanavar* is a highly specific, powerful international case study. The candidate uses her tragic death to forcefully argue against absolute "pro-life/Catholic" abortion bans, demonstrating how blind adherence to religious doctrine can practically result in the murder of the mother.
- **Diagrams & Presentation:** Uses a classic T-table directly pitting "Pro-life" arguments against "Pro-choice" arguments, concluding with a recommendation to use Aristotle's 'Golden Mean' (a case-by-case evaluation).

Question 2(a) (Conscience)

- **The Exact Question:** Conscience keeps ethics from fading when faced with a tough decision. Discuss in context of civil servants.
- **Examples Used:** Ashok Khemka, IAS; Abraham Lincoln quote.
- **Context of the Example:** *Ashok Khemka* is cited specifically regarding his decision to "bring to light DLF's distorted land transactions." This anchors the theoretical concept of 'conscience' in a famous, real-world Indian administrative battle against political-corporate nexus.
- **Diagrams & Presentation:** Uses arrows to visually link the chain of moral command: "Conscience -> helps to -> guide one's behaviour -> reflects ethical values."

Question 3(a) (Emotional Intelligence)

- **The Exact Question:** Emotional intelligence (EI) not only helps in managing stress but also transforms distress into eustress. Elaborate.
- **Examples Used:** M.S. Dhoni ("Captain Cool"); Surgical strike by soldiers after attack on base camp.
- **Context of the Example:** *M.S. Dhoni* is used as a universally understood archetype of managing immediate situational stress. The *Surgical Strike* is used brilliantly to illustrate "eustress"—how the Indian military channeled the profound distress and grief of a base camp attack into highly focused, successful, and motivating tactical action.
- **Diagrams & Presentation:** Bulleted points utilizing the "Eg." tag for quick visibility.

Question 4(b) (Anonymity of Civil Servants)

- **The Exact Question:** Civil servants should work for a cause and not for applause... examine why bureaucratic anonymity is considered a foundational value...
- **Examples Used:** Shah Faesal's tweet about rape culture in India (1964 Conduct Rules violation).
- **Context of the Example:** Used as a prime contemporary example of the "dilution of principle in the social media age." It perfectly illustrates how an officer expressing personal/political anguish on a public platform can perturb the neutral image of the civil service.

- **Diagrams & Presentation:** A highly structured block diagram stacking the arguments for anonymity (e.g., 1) Avoids political pressures, 2) Easier to focus 100% efforts on completion of task).

Question 5(a) & 5(b) (Rights vs Duties / Justice vs Force)

- **The Exact Question:** (Context: Rights without duties / Force without justice).
- **Examples Used:** Rowlatt Act ("No Dalil, No Vakil, No Appeal"); Chauri Chaura violence / Gandhi; Martin Luther King Jr.
- **Context of the Example:** The *Rowlatt Act* is cited as the ultimate historical manifestation of "Force without justice" (Tyranny), as it allowed arrest without trial. *Chauri Chaura* is used to show that when the 'duty' of non-violence was breached, Gandhi rightly revoked the 'right' to protest, showing the inextricable link between the two.
- **Diagrams & Presentation:** Uses boxed highlights for specific acts and quotes.

Question 6(a) (Ethics in IR)

- **The Exact Question:** Ethics in international relations is a myth, only national interest determines the foreign policy.
- **Examples Used:** Afghanistan crisis (2 decades of US involvement); Climate change negotiations; Ukraine-Russia crisis.
- **Context of the Example:** The *Ukraine-Russia crisis* is used to validate the prompt (Realism): India refused to condemn Russia to secure discounted oil, upholding its own energy security over moral grandstanding. Conversely, the *Afghanistan crisis* is used to show how forcing "liberal/ethical" agendas on other nations often ends in disaster.
- **Diagrams & Presentation:** Numbered points underlining key geopolitical concepts (e.g., rules-based global order).

Document 52: Swati Sharma - Ethics

Question 3(a) (Emotional Intelligence)

- **The Exact Question:** Emotional intelligence (EI) not only helps in managing stress but also transforms distress into eustress. Elaborate.
- **Examples Used:** Ashoka giving up war after Kalinga; Buddha's analogy of a rejected gift.
- **Context of the Example:** Uses a profound mythological/historical anecdote: When a man abused Buddha, Buddha stated that if a gift is offered and rejected, it belongs to the giver. This is used as a masterful analogy for using EI to process criticism—if you do not accept the emotional abuse, it remains with the abuser, preventing personal distress.
- **Diagrams & Presentation:** Uses a vertical flowchart tracing how EI works: "Self awareness -> proper channelising -> Self regulation -> prevent sudden response."

Question 5(b) (Justice vs Force)

- **The Exact Question:** Justice without force is futile, force without justice is tyrannical.
- **Examples Used:** Masood Azhar released after IC-814 hijack; Demand for withdrawal of AFSPA.
- **Context of the Example:** The *IC-814 hijack* represents "Justice without force being futile"—because the state lacked the immediate force/tactical advantage to secure the plane, justice failed, and a terrorist was released. *AFSPA* represents the public's fear of "Force without justice," where unchecked military power leads to a police state violating human rights.
- **Diagrams & Presentation:** Distinct paragraphs directly contrasting the two examples.

Question 6(a) & 6(b) (Ethics in IR & Political Corruption)

- **The Exact Question:** (Context: National interest in IR; Fear of losing power driving corruption).
- **Examples Used:** India purchasing Russian oil; Vaccine Maitri; Lal Bahadur Shastri resigning; Horsetrading (Defection).
- **Context of the Example:** *Vaccine Maitri* is contrasted with *Russian oil purchases* to show India balancing Idealism (solidarity) with Realism (energy security). *Lal Bahadur Shastri* is cited as the historical gold standard of a politician who did *not* fear losing power, resigning purely on moral responsibility for a train accident. *Horsetrading* is cited as the modern outcome of power-insecurity.
- **Diagrams & Presentation:** Standard numbered bullet points with explicitly underlined examples.

Case Study 7: Samuel the Tennis Player

- **The Exact Question:** (Context: Famous tennis player refuses vaccination, lies in affidavit).
- **Examples Used:** Assam COVID-19 rules; Akshay Kumar withdrawing from Pan-Masala endorsement.
- **Context of the Example:** The candidate grounds the abstract debate on "vaccine mandates" in local reality by citing *Assam's policy* (shops only allowed to open if vaccinated), proving mandates are a practical, utilized administrative tool. *Akshay Kumar* is cited to show that celebrities absolutely have a duty to perform "self-regulation" and bow to public morality, contradicting Samuel's selfish behavior.
- **Diagrams & Presentation:** Draws a classic "Stakeholders" map (Samuel <-> International citizens <-> Country 'A' authorities <-> Fans).

Case Study 8: IFS Officer Evacuation

- **The Exact Question:** (Context: Prioritizing evacuation of 6 distinct groups during a war).
- **Examples Used:** Specific prioritization logic.
- **Context of the Example:** The candidate provides a highly pragmatic, unsentimental order:

1. Diplomatic staff (to secure critical home country information/secrets).
2. Tourists (because they have no local knowledge and limited resources/accommodation).
3. Students (they live there and have some local awareness).
4. Friendly citizens (Neighborhood first policy).
5. Family (Kept late to show officer's selflessness).
6. Film crew (Kept last specifically because "big names can afford to live for a considerable period of time in safe place").

- **Diagrams & Presentation:** A strictly numbered list (1 to 6) with exactly one paragraph of justification for each.

Case Study 9: Rashmi SP (Communal Hate Speech)

- **The Exact Question:** (Context: Doctored video of a politician goes viral, sparking communal tension).
- **Examples Used:** Muzaffarpur riots; Udaipur killing (2022); Haridwar Hate Speech (2021); Black Lives Matter movement; Deep fakes.
- **Context of the Example:** The candidate proves the deadly stakes of the case study by citing the *Udaipur killing* and *Haridwar speech*, showing that unchecked hate speech leads directly to blood on the streets. *Black Lives Matter* is cited to acknowledge the positive mobilization power of social media before attacking its use for *Deep fakes*.
- **Diagrams & Presentation:**
    - A highly effective T-table directly distinguishing the legal/moral definitions of "Free Speech" vs "Hate Speech" (e.g., Rationality vs Fundamentalist Ideology).

Case Study 10: Dr Ashmita (Hospital Violence)

- **The Exact Question:** (Context: Doctor assaulted after patient dies of unpredictable postpartum hemorrhage; commits suicide due to police harassment).
- **Examples Used:** Blackmarketing of Remdesivir during COVID-19; Jabalpur hospital fire case.
- **Context of the Example:** *Critical Analysis Strategy:* When asked "Why do doctors face violence?", instead of only blaming the public, the candidate takes a nuanced administrative view. She cites the *Remdesivir black marketing* and the *Jabalpur fire negligence* to argue that the medical fraternity's own recent unethical conduct has severely eroded the public's trust, leading to a "decline in rationality" and mob justice when unpredictable deaths occur.
- **Diagrams & Presentation:**
    - A branching tree diagram identifying "Reason for rise in violence" (Rationality decline -> Unethical conduct of doctors -> Lack of accountability).

Case Study 12: Amit (Lithium Mining)

- **The Exact Question:** (Context: Lithium mining project requires displacing tribals and destroying a shrine. Naxal threat looms).
- **Examples Used:** IPCC report.
- **Context of the Example:** The candidate opens the answer by citing the *IPCC report* on irreversible global warming. This strategically establishes the absolute macro-economic and environmental necessity of the Lithium project (green mobility), validating the government's pressure and making the dilemma over tribal displacement much more profound.
- **Diagrams & Presentation:** Explicitly lists the dilemmas in an "X V/s Y" format (e.g., "Rise in mineral wealth V/s Risk of internal security").

Document 53: Swati Sharma - Essay

- **The Exact Question:** (Context: Eradicating Poverty and Inequality).
- **Examples Used:** Brazil's *Bolsa Familia* program; Multidimensional Poverty Index (MPI); PDS, NFSA, ICDS, PM Matru Vandana Yojana; Stand Up India; PM Garib Kalyan Anna Yojana; Universal Basic Income (UBI); JAM trinity (DBT, GPS tracking, SMS monitoring); *Janta ka Manch / Sunwai* (Social audits); SDGs (1, 4, 10).
- **Context of the Example:** The essay outlines a comprehensive administrative roadmap. *Bolsa Familia* is cited as an international gold standard for targeted welfare. The *MPI* statistic (lifting 275m people out of poverty) is used as empirical proof that state intervention works. *Janta ka Manch* is cited to prove that top-down funding must be matched by bottom-up social accountability to actually cure inequality.
- **Diagrams & Presentation:** The essay is structured in neat paragraphs. The rough work page reveals a thematic pentagon diagram linking "Tolerance, Compassion, Humanism, Integrity, Patriotism," showing her methodology for ensuring all ethical dimensions are touched upon before writing.

Document 54: Preksha Agrawal - Ethics (Specific Case Studies & Concepts)

Question 3(b) (Moral Myopia vs Moral Muteness)

- **The Exact Question:** Differentiate between Moral myopia vs Moral muteness.
- **Examples Used:** The Mahabharata (Duryodhana vs Bhishma).
- **Context of the Example:** The candidate brilliantly uses a single mythological epic to define both concepts. *Duryodhana* insulting Draupadi is used as an example of "Moral Myopia" (focusing on short-term gain/ego and lacking the long vision to see moral aspects). *Bhishma* remaining silent during the insult is used as the quintessential example of "Moral Muteness" (knowing morality is being harmed but choosing not to say or do anything).
- **Diagrams & Presentation:** A T-table directly comparing the two concepts across four distinct parameters, culminating in the shared Mahabharata example at the bottom.

Case Study: Samuel the Tennis Player

- **The Exact Question:** (Context: Famous tennis player refuses vaccination, lies in his affidavit, and faces deportation).
- **Examples Used:** Lance Armstrong; Virat Kohli / Steve Smith; Sachin Tendulkar.
- **Context of the Example:** Instead of generic statements about "celebrity responsibility," the candidate uses hard sports history. *Lance Armstrong* (7-time Tour-de-France winner) is cited to show how corrupt conduct ultimately hurts fans regardless of talent. *Virat Kohli* (admonishing fans who booed Steve Smith) is used to show a celebrity actively using their platform to uphold sportsmanship. *Sachin Tendulkar* (walking off the field without waiting for the umpire's decision) is used to define ultimate integrity.
- **Diagrams & Presentation:** Uses a highly effective sub-heading "[Vaccine Mandates]" and explicitly argues that they are a "reasonable restriction" because developing countries face a "resource crunch," proving that public health supersedes individual liberty.

Case Study: Rashmi SP (Communal Hate Speech)

- **The Exact Question:** (Context: Doctored video of a politician goes viral, sparking communal tension).
- **Examples Used:** Muzaffarpur riots; Udaipur killing (2022); Haridwar Hate Speech (2021); #BLACKLIVESMATTER.
- **Context of the Example:** The candidate anchors the theoretical danger of hate speech in recent, bloody reality (*Udaipur killing*). She contrasts this with the *Haridwar Hate Speech* to show how fundamentalist ideology triggers animosity. *#BLACKLIVESMATTER* is cited in the second part of the answer to show the positive, cross-border exchange of ideologies made possible by social media, balancing the critique.
- **Diagrams & Presentation:** Uses a highly structured T-table to differentiate "Free Speech" vs "Hate Speech". Parameter 1: Conveys important message vs Conveys hatred. Parameter 2: Triggers informed citizenry vs Creates radical citizenry. Parameter 3: Based on rationality vs Based on fundamentalist ideology.

Case Study: IFS Officer Evacuation

- **The Exact Question:** (Context: Prioritizing evacuation of 6 distinct groups during a war).
- **Examples Used:** Article 51 of the Constitution.
- **Context of the Example:** The candidate prioritizes "Citizens of the friendly neighbouring country" *first*. To legally and ethically justify this highly unconventional choice, she cites *Article 51* (Promote international peace and security) to argue that honoring the trust reposed in India by a neighbor is the highest diplomatic duty.
- **Diagrams & Presentation:** A numbered list with arrows explicitly linking the "Group" to the "Reasoning".

Document 55: Swati Sharma - Ethics (Specific Case Studies)

Case Study: Bhuvan-Ultra

- **The Exact Question:** (Context: Bhuvan-ultra constructed two illegal residential towers on a wetland. The court ordered demolition).
- **Examples Used:** Article 21 (Right to life); flashfloods.
- **Context of the Example:** Evaluates the environmental cost of the actual *demolition*. The candidate smartly points out that demolishing the towers might solve the wetland encroachment, but it creates a massive "construction waste" disposal issue and risks the structural integrity of the legally occupied towers, potentially violating their residents' *Article 21* rights.
- **Diagrams & Presentation:**
    - *Extensive Dilemma Mapping:* Uses a bracket diagram linking "Ethical dilemma" to four sub-dilemmas (e.g., Short term benefit of avoiding demolition V/S long term benefit as the encroachment in wetland could lead to flash floods).
    - *Action Plan:* Suggests penalizing the builder, but using the funds to build "resilient building bases" to tolerate adverse climate events, rather than pure demolition.

Case Study: Amit (Lithium Mining)

- **The Exact Question:** (Context: Lithium mining project requires displacing tribals and destroying a shrine. Naxal threat looms).
- **Examples Used:** IPCC report.
- **Context of the Example:** The candidate opens the answer by citing the *IPCC report* on irreversible global warming. This strategically establishes the absolute macro-economic and environmental necessity of the Lithium project (green mobility), validating the government's pressure.
- **Diagrams & Presentation:**
    - *Saam/Dandh Alternative:* In her recommendations, she suggests a 10-point plan, crucially advising Amit to use the "old genius of tribals for making mining a sustainable affair," turning the aggrieved party into stakeholders.
    - *Dilemma Formatting:* Explicitly lists the dilemmas in an "X V/s Y" format (e.g., "Rise in mineral wealth V/s Risk of internal security").

Document 56: Umaharathi N - Ethics (Presentation Deep-Dive)

Case Study: Universal Sisterhood of Dreams (Sweatshops)

- **The Exact Question:** (Context: NGO head uses profits from a clothing brand utilizing sweatshops in a developing country).
- **Examples Used:** Kant's Categorical Imperative; The 'Saam' and 'Dandh' approach; Gandhiji ("Commerce without morality is a sin"); Bill Gates, Narayan Murthy.

- **Context of the Example:** The candidate elevates an NGO funding crisis into a debate on global capitalism. She quotes *Gandhi* to firmly establish that legality (the contractor followed local Taba laws) does not equal morality. She cites *Bill Gates* and *Narayana Murthy* as real-world champions of "Stakeholder Capitalism," proving that ethical business is practically viable.
- **Diagrams & Presentation:**
    - *Matrix Evaluation:* The candidate uses a highly effective two-column matrix titled "**Course of action**" and "**Justification**".
    - *Step 1:* "Reach out to victims with personal apology" -> *Justification:* "Minimum act of empathy".
    - *Step 2:* "Cancel contract unless contractor agrees to international standards" -> *Justification:* "The 'Saam' approach with 'Dandh' to bring change."
    - *Step 7:* "Cut my own salary/profit share" -> *Justification:* "As a leader Anuradha should be first to accept financial difficulties in short term for a greater cause."

Final Expert Synthesis of the Toppers' Strategies Across All Documents:

Having meticulously evaluated every single page of the provided copies, here is the ultimate distillation of the exact strategies these UPSC CSE 2022 toppers used to score top marks:

1. **The "External Mapping" Strategy (Case Studies):** None of the toppers treat case studies as isolated fiction. They immediately map the fictional scenario to a real-world equivalent in the first paragraph. (e.g., Mapping the tennis player to *Novak Djokovic*; mapping the housing scam to *Adarsh Housing* or *Commonwealth Games*; mapping the hospital violence to *COVID-19 Remdesivir black-marketing*). This proves immense administrative awareness.
2. **The "Stakeholder Web" (Ethics):** Almost 100% of the Ethics case studies start with a drawn bubble-map or bracket-diagram of "Stakeholders." This acts as a visual checklist for the evaluator to see that the candidate has not missed any marginalized or secondary affected party.
3. **"V/s" Dilemma Structuring:** Ethical dilemmas are rarely written in long paragraphs. They are strictly codified using a "V/s" or "Versus" format (e.g., *Environmental Justice V/s Socio-economic development*).
4. **Data as an Opening Hook (GS 1, 2, 3):** Introductions rarely define terms abstractly. They open with hard data. (e.g., Using PLFS data for employment questions; using the 11:7:1 NPK ratio for fertilizer questions; using exact GDP percentages).
5. **Micro-Examples to Prove Macro-Points:** Instead of writing "infrastructure is bad," they write "the cycle of onion prices." Instead of writing "caste system is changing," they write "the rise of BSP and Kanshi Ram."
6. **Tabular Domination:** The toppers aggressively use 2-column or 3-column tables (T-tables) to save time and space. They use them for *Comparisons* (India vs Sri Lanka), *Evaluations* (Merits vs Demerits), and *Action Plans* (Course of Action vs Justification).

7. **Sub-Bulleting with Symbols ("↳", "Eg:"):** They strictly visually separate their main theoretical argument from their real-world evidence by dropping the example to the next line and using a distinct symbol like an indented arrow or a boxed "Eg:", ensuring the evaluator's eye catches the evidence immediately.

Document Addendum 1: Anoushka Sharma - Ethics & Essay

Case Study: IFS Officer Evacuation

- **The Exact Question:** As a civil services officer heading a diplomatic mission in a besieged country, what would be the order in which you would evacuate 6 specific groups of people (You/family, Diplomatic staff, Indian tourists, Indian students, Bollywood film crew, Citizens of a friendly neighbouring country)? Give justifications.
- **Examples Used:** specific prioritization logic; JFK quote ("Ask not what your country can do...").
- **Context of the Example:** The candidate demonstrates exceptional administrative pragmatism by prioritizing based on *vulnerability* rather than status.
    1. **Tourists:** Evacuated first because they live in hotels, have the most limited resources, and lack local knowledge.
    2. **Students:** Evacuated second as they share spaces and have limited resources, but possess slightly more local awareness.
    3. **Neighbouring Citizens:** Third, to maintain international relations and goodwill.
    4. **Bollywood Crew:** Evacuated fourth specifically because "they are relatively rich, they can survive for longer in such a situation" and live in secure clusters.
    5. **Staff & Family:** Evacuated last because they enjoy "diplomatic immunity" and embassies are generally not attacked. The candidate (IFS officer) stays until the absolute end, anchoring this to the JFK quote on national duty.
- **Diagrams & Presentation:** Uses a boxed heading [* Order of Priority] and underlines the specific stakeholder group in each paragraph for rapid readability,.

Essay (Evasion of Reality)

- **The Exact Question:** (Context: The consequences of denying or evading reality).
- **Examples Used:** Arunima Sinha (Amputee mountaineer).
- **Context of the Example:** Used to transition the essay from macro-political realities to *individual* reality. The candidate explains that when Arunima was thrown from a train and became an amputee, she did not evade this harsh reality. By objectively accepting it, she was able to act and eventually scale Mt. Everest.
- **Diagrams & Presentation:** Pure essay format with underlined key philosophical terms ("objectivity and accountability").

Document Addendum 2: Ishita Kishore - Ethics

Case Study: Bhuvan-Ultra

- **The Exact Question:** Evaluate options to achieve justice in the case of illegal residential towers constructed on a wetland, apart from demolition.
- **Examples Used:** Centre of Excellence; Compensatory Afforestation; CAMPA funds (Net Present Value).
- **Context of the Example:** The candidate provides highly technical, administrative alternatives to demolition. Instead of destroying the towers, she suggests seizing them and converting them into a "research building / Centre of Excellence for environmental studies". To achieve environmental justice, she recommends forcing the builder to undertake "Compensatory Afforestation" and contribute to "CAMPA funds based on Net Present Value of wetland along with 50 years of its productive capacity".
- **Diagrams & Presentation:** Uses a structured, Roman-numeral bulleted list with explicitly underlined technical administrative terms.

Case Study: IFS Officer Evacuation

- **The Exact Question:** Prioritizing evacuation of 6 distinct groups during a war.
- **Examples Used:** "India's altruism".
- **Context of the Example:** She prioritizes the "citizens of friendly country" specifically to "showcase India's altruism at the global stage and also cement relations of goodwill".
- **Diagrams & Presentation:** Highlights the core psychological strategy in the conclusion: "a systematic categorisation based on reason & logic will ensure psychological cooperation during evacuation".

Document Addendum 3: Preksha Agrawal - Ethics

Question 3(b) (Moral Myopia vs Moral Muteness)

- **The Exact Question:** Differentiate between Moral myopia vs Moral muteness.
- **Examples Used:** The Mahabharata (Duryodhana vs Bhishma).
- **Context of the Example:** The candidate brilliantly uses a single mythological epic to define both concepts. *Duryodhana* insulting Draupadi is used as the example of "Moral Myopia" (focusing on short-term gain/ego without long-term moral vision). *Bhishma* remaining silent during the insult is used as the quintessential example of "Moral Muteness" (knowing morality is being harmed but choosing not to say or do anything).
- **Diagrams & Presentation:** A T-table directly comparing the two concepts across parameters, culminating in the shared Mahabharata example at the bottom.

Question 4(b) (Anonymity of Civil Servants)

- **The Exact Question:** Civil servants should work for a cause and not for applause... examine why bureaucratic anonymity has been diluted in the age of social media.
- **Examples Used:** Shah Faesal's tweet.

- **Context of the Example:** Cites Shah Faesal's tweet about "rape culture in India" as a prime example of crossing the line on social media, explicitly noting that it "violated guidelines of Civil Service (Conduct) Rules, 1964" by revealing political/social biases to a mass audience.
- **Diagrams & Presentation:** A highly structured block diagram stacking the arguments for anonymity.

Question 5(a) (Rights vs Duties)

- **The Exact Question:** A man can give up a right, but he may not give up a duty without being guilty of a grave dereliction.
- **Examples Used:** Rowlatt Act; Chauri Chaura violence.
- **Context of the Example:** The *Rowlatt Act* ("No Plea, lawyer, Appeal") is cited as the ultimate historical manifestation of rights being taken away by a tyrannical state. *Chauri Chaura* is used to show that when the 'duty' of non-violence was breached, Gandhi rightly revoked the 'right' to protest, showing the inextricable link between the two.
- **Diagrams & Presentation:** Boxed highlights for specific historical acts and quotes.

Case Study: Samuel the Tennis Player

- **The Exact Question:** Discuss the ethical responsibility of famous personalities while conducting themselves in public.
- **Examples Used:** Virat Kohli / Steve Smith; Lance Armstrong; Sachin Tendulkar.
- **Context of the Example:** Instead of generic statements, the candidate uses hard sports history. *Virat Kohli* (admonishing fans who booed Steve Smith) is used to show a celebrity actively using their platform to uphold sportsmanship. *Lance Armstrong* is cited to show how corrupt conduct ultimately hurts fans regardless of talent. *Sachin Tendulkar* (walking off the field without waiting for the umpire's decision) is used to define ultimate integrity.
- **Diagrams & Presentation:** Bulleted list dropping directly into specific, named examples.

Document Addendum 4: Swati Sharma - Ethics

Question 3(a) (Emotional Intelligence)

- **The Exact Question:** Emotional intelligence (EI) not only helps in managing stress but also transforms distress into eustress. Elaborate.
- **Examples Used:** Ashoka post-Kalinga; Buddha's analogy of a rejected gift.
- **Context of the Example:** Uses a profound mythological/historical anecdote: When a man abused Buddha, Buddha stated that if a gift is offered and rejected, it belongs to the giver. This is used as a masterful analogy for using EI to process criticism—if you do not accept the emotional abuse, it remains with the abuser, preventing personal distress.
- **Diagrams & Presentation:** Uses a vertical flowchart tracing how EI works.

Question 5(b) (Justice vs Force)

- **The Exact Question:** Justice without force is futile, force without justice is tyrannical.
- **Examples Used:** Masood Azhar (IC-814 hijack); AFSPA.
- **Context of the Example:** The *IC-814 hijack* represents "Justice without force being futile"—because the state lacked the immediate force to secure the plane (delay in prosecution), a terrorist had to be released. *AFSPA* represents "Force without justice," where unchecked military power leads to the creation of a "police state in place of a welfare state".
- **Diagrams & Presentation:** Distinct paragraphs directly contrasting the two examples.

Case Study: Bhuvan-Ultra

- **The Exact Question:** Evaluate options apart from demolition for illegal towers on a wetland.
- **Examples Used:** Construction waste hazard; resilient building bases.
- **Context of the Example:** The candidate smartly points out the environmental hypocrisy of demolition: demolishing the towers might solve the wetland encroachment, but it creates a massive "proper disposal of the construction waste" issue and risks weakening the associated legal buildings. She suggests making the builders "create resilient building base so that it can tolerate any flashfloods" instead of tearing them down.
- **Diagrams & Presentation:** Extensive dilemma mapping using bracket diagrams.

Document Addendum 5: Umaharathi N - Ethics

Case Study: Bhuvan-Ultra

- **The Exact Question:** Evaluate options for illegal towers on a wetland.
- **Examples Used:** NGT (National Green Tribunal) ruling; Bertrand Russell; Indian ethic.
- **Context of the Example:** In her T-table evaluating options, she lists "Ex post facto clearance" as an option, but immediately invalidates it in the 'Cons' column by citing the NGT: "'Ex post facto clearance is fraud on Environmental law'". She concludes with profound philosophical justification, quoting Bertrand Russell ("Coexistence or no existence") and the ancient ethic "Vruksho rakshati rakshita" to argue for protecting nature to achieve SDGs.
- **Diagrams & Presentation:** Uses a massive, multi-page T-table to compare the "Pros" and "Cons" of specific administrative options (e.g., Seize and seal the tower, Allow occupation with compensation).

Case Study: Universal Sisterhood of Dreams (Sweatshops)

- **The Exact Question:** NGO head uses profits from a clothing brand utilizing sweatshops in a developing country. Fire kills workers. What is the course of action?

- **Examples Used:** Kant's Categorical Imperative; The 'Saam' and 'Dandh' approach; Gandhiji; Bill Gates, Narayan Murthy.
- **Context of the Example:**
    - She brilliantly applies traditional Indian statecraft to the corporate contractor: "The 'Saam' approach with 'dandh' to bring change" (Persuade first, punish/cancel contract if they refuse).
    - She quotes *Gandhi* ("Commerce without morality is a sin") to firmly establish that legality does not equal morality.
    - She cites *Bill Gates* and *Narayana Murthy* as real-world champions of "Stakeholder Capitalism," proving that ethical business is practically viable and expected.
- **Diagrams & Presentation:**
    - Explicitly defines dilemmas using "V/s" (e.g., "Protecting financial viability of company V/s upholding ethical/moral command").
    - Uses a highly effective two-column matrix titled "**Course of action**" and "**Justification**" to lay out a 7-step plan.

Document Addendum 6: Pavan Datta - Essay

Essay (Cyberspace)

- **The Exact Question:** Cyberspace - The fifth arena of warfare.
- **Examples Used:** Banning of Chinese Apps by India; Israel vs Iran cyber warfare; Russia meddling in USA elections.
- **Context of the Example:** Maps contemporary geopolitical conflicts directly to the cyber realm.
- **Diagrams & Presentation:** *Phenomenal Hook Technique:* The candidate does not start the essay with a standard paragraph. Instead, he draws literal, staggered boxes representing "Newspaper Headlines" (e.g., "[INDIA BANS CHINESE APPS]", "[ALLEGED RUSSIA MEDDLES WITH RECENT USA ELECTIONS]"). This immediately grabs the evaluator's attention and sets an urgent, contemporary tone.

Document Addendum 7: Waseem Ahmad Bhat - Ethics

Case Study: Sarita and Jayant (Dual-Career Couple Dilemma)

- **The Exact Question:** (Context: A couple faces a dilemma of managing their respective dream jobs in different locations).
- **Examples Used:** Administrative transfer rules (DoPT).
- **Context of the Example:** Instead of vague advice about "compromising," the candidate offers highly specific, practical bureaucratic solutions. He advises that if a private job cannot be found in the NE, "Jayant should take a deputation by contacting DoPT about the situation" noting that it "May be possible under some rules".

- **Diagrams & Presentation:** Simple numbered points with flowchart-style arrows ("↳") linking the problem to the administrative solution.

Document 57: Abhinav Siwach - GS Paper 1

Question 3

- **The Exact Question:** The history of freedom struggle is replete with the saga of sacrifice, selflessness, bravery of women. Illustrate through examples.
- **Examples Used:** Rani Laxmibai; Kadambini Ganguly, Kamini Roy; Sarojini Naidu, Kanaklata Barua; Rani Gaidinliu (Heraka cult); Kalpana Dutt, Pritilata Wadedar; Aruna Asaf Ali, Usha Mehta (underground radio); Madam Bhikaji Cama, Annie Besant.
- **Context of the Example:** The candidate provides an exhaustive, chronologically categorized list. *Kanaklata Barua* and *Rani Gaidinliu* are strategically used to ensure North-East representation. *Usha Mehta* is cited to highlight non-combat, logistical bravery.
- **Diagrams & Presentation:** *Exceptional Presentation Technique:* The candidate draws an actual **Line Graph** titled "Role of Women," with the X-axis mapping the chronological timeline (Revolt of 1857 -> Swadeshi -> Non-Cooperation -> Civil Disobedience -> Quit India) and the Y-axis mapping participation from "Low" to "High," visually proving the upward trajectory of women's involvement.

Question 7

- **The Exact Question:** What do you understand by modernization? Is Indian society a modern one? Justify your answer.
- **Examples Used:** Max Weber, Durkheim; Yogendra Singh; Sabarimala temple entry; NCRB data (93 crimes committed against SC/ST daily).
- **Context of the Example:** Sociologists (Weber, Durkheim, Singh) are cited to give the answer strict academic grounding. The *NCRB data* and *Sabarimala* are used as hard, contemporary counter-evidence to prove that despite technological advances, India still struggles with deep-rooted traditional hierarchies.
- **Diagrams & Presentation:** Uses a highly effective T-table directly mapping "Old Values" (e.g., Hierarchy, decisions based on emotions) transitioning via arrows to "Newer Values" (e.g., Egalitarianism, Rationality).

Question 8

- **The Exact Question:** Analyze the role of digital technologies in bridging gender gap in India.
- **Examples Used:** WEF Global Gender Gap Index 2021 (Rank 140); Amazon, Flipkart; Kudumbashree NGOs; Phogat sisters; Gunjan Mehta; #MeToo campaign.
- **Context of the Example:** Opens with the *WEF Index* to quantify the problem. *Kudumbashree* is used to show grassroots economic empowerment via e-commerce. *Phogat sisters* and *Gunjan Mehta* are cited to show how tech disseminates success

stories to change patriarchal attitudes. *#MeToo* represents direct political/social advocacy.

- **Diagrams & Presentation:** Distinctly categorized using boxed, circled alphabets: [A] Economic Gap, [B] Social Gap, [C] Political Gap.

Question 9

- **The Exact Question:** Caste system is a dynamic reality that is acquiring a greater degree of flexibility... elucidate how the caste system has changed since independence...
- **Examples Used:** Sanskritisation; Dalit Panther, BSP; Mandal Commission; Marathas / Jats; LGBT+, widows.
- **Context of the Example:** The candidate maps the evolution brilliantly: *Mandal Commission* led to backward caste consciousness, which later evolved into "De-sanskritisation" where dominant castes like *Marathas and Jats* actively demanded backward status. Concludes creatively by mentioning *LGBT+ and widows* as new flexible identity "castes" that need intersectional focus.
- **Diagrams & Presentation:** Utilizes a linear "Phase" timeline across the page: Phase I (1950s - Sanskritisation) -> Phase II (1980s - Caste consciousness) -> Phase III (1990s - Casteisation of politics) -> Phase IV (Present - Low caste consciousness).

Question 10

- **The Exact Question:** Poverty is not only lack of resources but also lack of opportunity to improve one's standard of living... Elaborate.
- **Examples Used:** Amartya Sen; Census 2011 (21.9% poor); PLFS (37.6% female LFPR); 1 out of 82 Joint Secretaries from SCs; NEP 2020, Skill India.
- **Context of the Example:** Anchors the entire answer in *Amartya Sen's Capability Approach*. The *Joint Secretary statistic* is a phenomenal administrative data point used to prove the "lack of opportunity" for marginalized castes at the highest levels of governance.
- **Diagrams & Presentation:** Draws a cyclic flowchart titled "Vicious cycle of poverty" (Poverty -> Lack of education -> Lack of skills -> Lack of employment -> Lack of income -> Poverty).

Document 58: Garima Lohia - GS Paper 1

Question 7

- **The Exact Question:** What do you understand by modernization? Is Indian society a modern one?
- **Examples Used:** McDonaldization of food; Walmartization of shopping; Manual Scavengers (97.2% are SCs); Global Gender Gap Report (135/146 rank, 9.1% women political representation vs 22% global avg); Navtej Singh Johar (Section 377); Gaurav Jain vs UOI (Sex workers).
- **Context of the Example:** The candidate introduces the brilliant sociological concept of **"Mistaken Modernity,"** citing *McDonaldization* and *Walmartization* to argue that

India has merely Westernized its consumer habits without truly modernizing its core values. The *Navtej Johar* and *Gaurav Jain* Supreme Court cases are cited to prove that it is the Constitution/Judiciary forcibly driving modern egalitarianism in a resistant society.

- **Diagrams & Presentation:** A "Block Arrow" diagram bridging two columns: "Traditional Society" (hierarchical, collective) -> [Forces of new social change] -> "Modern Indian Society" (egalitarian, individualistic).

Question 10

- **The Exact Question:** Poverty is not only lack of resources but also lack of opportunity...
- **Examples Used:** UNDP Multi-Dimensional Poverty Index (27.3%); Amartya Sen; Dani Rodrik's 'Productivism'.
- **Context of the Example:** The candidate elevates a standard poverty answer by citing Harvard economist *Dani Rodrik's concept of 'Productivism'* in the conclusion, arguing that the state must intervene to provide attractive job opportunities in the formal economy rather than just relying on trickle-down growth or raw welfare.
- **Diagrams & Presentation:** Multiple structured flowcharts linking cause to effect (e.g., "Poverty leads to reduced investment in skill dev -> employment in informal sector -> lack of social security -> perpetuates poverty").

Question 13

- **The Exact Question:** Was the Indian National Congress a British strategy or a culmination of nationalistic efforts?
- **Examples Used:** Safety Valve Theory; A.O. Hume, Lord Dufferin; R.P. Dutt, Gopal Krishna Gokhale ("Lightning Conductor"); Bangabhasha Paribhasika Sabha (1836).
- **Context of the Example:** Evaluates historiography. Mentions the *Safety Valve Theory* (British strategy) but heavily counters it with *Gokhale's "Lightning Conductor" theory*, which argues Indians deliberately used A.O. Hume as a shield to prevent the British from crushing the infant organization. *Bangabhasha Sabha* is cited to prove that Indian political organization was an indigenous effort starting decades before 1885.
- **Diagrams & Presentation:** Uses branching arrows and explicitly boxed keywords like [Safety Valve Theory] and [Lightning Conductor].

Document 59: Preksha Agrawal - GS Paper 1

Question 14

- **The Exact Question:** Identify and examine reasons behind the deglobalization wave across the world. Analyze its impact on the Indian society.
- **Examples Used:** US-Refusal to grant H1B visa; BREXIT; PIIGS (Portugal, Italy, Greece, Spain) 2008 meltdown; Victor Orban (Hungary); US abortion issue; France/Switzerland Hijab ban; Huawei 5G ban; Rohingya crisis.

- **Context of the Example:** Provides exhaustive global coverage. *PIIGS* proves economic instability driving closed borders. *Victor Orban* illustrates the political rise of anti-immigrant sentiment. *France's Hijab ban* illustrates cultural protectionism. The *Huawei ban* illustrates technological/geopolitical deglobalization.
- **Diagrams & Presentation:** *Mapping Strategy:* Draws a world map and directly points out deglobalization hotspots using text boxes (e.g., A box over Europe saying "BREXIT", a box over the US saying "US-Refusal to grant H1B visa").

Document 60: Swati Sharma - Ethics

Question 3(a)

- **The Exact Question:** Emotional intelligence (EI) not only helps in managing stress but also transforms distress into eustress. Elaborate.
- **Examples Used:** Ashoka post-Kalinga; Buddha's analogy of a rejected gift.
- **Context of the Example:** The candidate uses a profound philosophical/mythological anecdote: When a man abused Buddha, Buddha asked him to whom a gift belongs if it is offered but rejected. The man replied it belongs to the giver. Buddha used this to explain EI—if you do not accept/internalize the emotional abuse, it remains with the abuser.
- **Diagrams & Presentation:** A vertical flowchart mapping the internal process: "self awareness of emotions -> leads to proper channelising -> self regulation -> prevent sudden response".

Question 5(b)

- **The Exact Question:** Justice without force is futile, force without justice is tyrannical.
- **Examples Used:** Masood Azhar (IC-814 hijack); Demand for withdrawal of AFSPA.
- **Context of the Example:**
    - *Justice without force is futile:* Cites the *IC-814 hijack*, explaining that because the state lacked immediate tactical force (or due to delay in prosecution), justice was rendered futile, and a terrorist (Masood Azhar) had to be released.
    - *Force without justice is tyrannical:* Cites *AFSPA*, noting that deploying military force without adequate civilian safeguards denies ethical principles and creates a "police state in place of a welfare state".
- **Diagrams & Presentation:** Distinctly separated paragraphs directly addressing the two halves of the prompt.

Question 6(a)

- **The Exact Question:** Ethics in international relations is a myth, only national interest determines the foreign policy.
- **Examples Used:** India purchasing discounted Russian oil; Vaccine Maitri.
- **Context of the Example:** The candidate balances the realist vs idealist debate. She validates the prompt by citing India buying *Russian oil* despite the Ukraine crisis to

prioritize domestic energy security. She counters the prompt by citing *Vaccine Maitri*, showing that India also exercises solidarity and common good over pure self-interest.

- **Diagrams & Presentation:** Standard bullet points with underlined "Ex:-" tags.

Case Study: Dr Ashmita (Hospital Violence)

- **The Exact Question:** (Context: Doctor assaulted after patient dies of unpredictable postpartum hemorrhage; commits suicide due to police harassment. Why do doctors face violence?)
- **Examples Used:** Blackmarketing of Remdesivir during COVID-19; Jabalpur hospital fire case.
- **Context of the Example:** *Exceptional Objectivity:* When asked why the public commits violence against doctors, the candidate does not solely blame the "mob". Instead, she turns a critical eye on the medical fraternity itself. She cites the *Remdesivir black marketing* and the *Jabalpur hospital fire* as recent examples of grave unethical conduct and negligence by doctors that have severely eroded public trust, leading directly to the current mob-justice mentality.
- **Diagrams & Presentation:** Uses a branching bracket to list "Reason for rise in violence" (Rationality decline -> unethical conduct -> lack of accountability).

Case Study: Samuel the Tennis Player

- **The Exact Question:** (Context: Famous tennis player refuses vaccination, lies in affidavit. Are vaccine mandates a violation of liberty?)
- **Examples Used:** COVID-19 rules in Assam; Akshay Kumar withdrawing from Pan-Masala endorsement.
- **Context of the Example:** The candidate supports vaccine mandates by grounding them in local administrative reality, citing *Assam's policy* where shops were only allowed to open if the owner was vaccinated. To discuss celebrity responsibility, she cites *Akshay Kumar*, showing that public figures routinely have to bow to public morality and practice "self-regulation."
- **Diagrams & Presentation:** Uses a "V/S" format to map the core ethical issues (e.g., Individual liberty V/S common good; private interest V/S public interest).

Case Study: IFS Officer Evacuation

- **The Exact Question:** (Context: Prioritizing evacuation of 6 distinct groups during a war).
- **Examples Used:** Specific prioritization logic.
- **Context of the Example:** *Contrasting Strategy:* Unlike other toppers who placed the film crew in the middle, Swati Sharma places the **"Film crew with big names" LAST** (right before herself). Her justification is highly pragmatic: "Film crew with big names can afford to live for a considerable period of time in safe place so they would be last to be evacuated." She prioritizes Diplomatic Staff -> Tourists -> Students -> Friendly Neighbors -> Family -> Film Crew -> Self.
- **Diagrams & Presentation:** A numbered list from 1 to 6 with specific, pragmatic justifications for each tier.

Document 61: Gunjita Agrawal - Essay

Essay (Digital Minimalism)

- **The Exact Question:** Digital minimalism - the path towards solving social media paradox.
- **Examples Used:** NFTs; Mark Zuckerberg ("connectivity is a basic human right"); ORKUT / Yahoo; Netflix's 'Black Mirror'; Sushant Singh Rajput (media trials); The Social Dilemma documentary; Tinder.
- **Context of the Example:** The candidate masterfully traces the emotional trajectory of the internet. She uses *ORKUT/Yahoo* to invoke nostalgia for early, deliberate digital connection. She uses *Zuckerberg's quote* to show the utopian promise. She then uses *Black Mirror* and the *Sushant Singh Rajput* media trial to show the dystopian reality (dehumanization and the "social media paradox"). *Tinder* is used in the conclusion to suggest a minimalist compromise: use the app to match, but prioritize real-life meetups.
- **Diagrams & Presentation:** The essay relies on a highly conversational, philosophical tone, utilizing rhetorical questions to hook the reader: "We are all born free; But are we really?"

Document 62: Waseem Ahmad Bhat - Ethics

Question 6 (Quotes Analysis)

- **The Exact Question:** "Peace is not mere absence of war; it is presence of justice." / "Happiness is a mysterious thing..."
- **Examples Used:** Caste system / Untouchables; Capitalists wealth; Teenage suicides over "likes".
- **Context of the Example:**
  - *Peace:* Argues that the Indian society historically appeared "peaceful" because there was no active war, but the *caste system* meant there was systemic violence against untouchables, proving there was no true peace because there was no justice.
  - *Happiness:* Uses Aristotle's 'Golden Mean' to define happiness. Highlights the modern tragedy of "Teenage suicides over likes and followers" to prove that indulging in too much materialism/social media leads to a "maya" (illusion) that destroys happiness.
- **Diagrams & Presentation:** Standard paragraph format with boxed philosophers' names and heavily underlined core arguments.
